GRAIN MARKETS DULL

Cash grain markets were dull in quiet trading during the holiday week ending January 2. Prices were mixed with corn, soybeans, and spring wheat closing below a week ago. Barley and grain sorghum prices advanced slightly.

Winter wheat markets held steady at most points with somewhat larger offerings resulting from a moderately expanded farm selling. Export demand readily absorbed the additional offerings and prices were fractionally higher. Snow cover over much of the Midwest early in the period provided much needed protection. Plant conditions are fairly good although additional moisture is needed over large areas. Spring wheat declined 3-4¢ per bushel as flour sales were at a standstill and export business was dull. Durum wheat went up 2¢ reflecting improved inquiry. White wheat in the Pacific Northwest advanced 1-2¢ per bushel, influenced mainly by anticipated business with India and Japan and extremely tight country selling. Rye declined 2¢ since there was nothing in the way of export news and flour sales were quiet.

Corn prices were mostly 1¢ per bushel below a week ago. Demand was generally good for rather light country offerings. Export demand was light. Oats declined 1¢ per bushel due in part to the weakness in corn. Barley advanced 1-2¢ per bushel with improved demand for light offerings. Grain sorghum advanced 1-2¢ per cwt. due mainly to limited offerings.

Soybeans declined 5-6¢ per bushel reflecting weakness in oil and meal. Crushers expressed disappointment over present conversion rates which was a factor in the weak market. Trading continued rather light. Flaxseed was offered in only moderate quantities and demand remained steady with prices at last week's level at Minneapolis.

FEED GRAIN PRODUCTION ... of the four feed grains in 1963 totaled 155.9 million tons, 9 percent more than last year's 142.9 million tons. The first 4 billion bushel corn crop and an increase in sorghum grain more than offset smaller 1963 totals for oats and barley. Acreage devoted to feed grains was 4 percent greater than last year, but 14 percent smaller than average. Feed grains came through with record high yields per acre for corn and oats and a near record for barley. Corn for grain acreage was 7 percent more than in 1962. Favorable growing conditions in most of the North and South Central areas pushed the yield per acre to 67.3 bushels, surpassing the previous high of 64.2 bushels in 1962. Sorghum acreage for grain expanded 17 percent. The average yield of 43.3 bushels per acre has been exceeded only by 1961 and 1962. Oats acreage continued to decline with a drop of 4 percent from last year while the average yield of 45.1 just passed the previous high of 45.0 bushels in 1962. Barley acreage harvested declined 7 percent. The yield of 34.7 bushels on the remaining acreage was second only to the 1962 yield of 35.1 bushels per acre.

350,000 TONS OF DURUM WHEAT ... were sold to the Soviet Union, according to trade reports. The wheat is valued at \$30 million and is equivalent to about 13 million bushels. This is the first sale of wheat reported to the Soviet Union. United States has an unusually large supply of durum wheat. This year's crop totaled nearly 50 million bushels while the carryover amounted to 46 million bushels. Domestic requirements of durum wheat total around 25-30 million bushels.

Grains: Export prices basis prompt or 30-day shipment, January 2, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

MOST GRAIN MARKETS STRENGTHEN

Prices of most cash grains moved up a cent or two during the week ended January 9. News of wheat sales to Russia dominated all market factors. Practically all grains met fairly aggressive demand.

Winter wheat prices edged up 1-3¢ per bushel. Export interest in wheat was brisk, and mills were actively in the market seeking supplies to cover both domestic and overseas orders. Selling by farmers, however, fell short of many expectations. Movement from the country to terminals was hampered in some areas by boxcar shortages. Spring wheat went up 2-3¢ at Minneapolis, reflecting the good export market. Durum, however, declined 2¢ with larger receipts influencing buyers' ideas of prices. White wheat advanced 5-6¢ and winter wheat gained 3-5¢ in the Pacific Northwest where country selling was slow and daily offerings were readily absorbed by domestic flour mills and exporters. Rye advanced 4¢ at Minneapolis. Except for higher rye futures at Chicago and good demand at Duluth, constructive news was lacking.

Corn closed 1-2¢ per bushel higher behind good demand for light offerings. Oats firmed up a little with improved demand for rather limited offerings. Barley held firm at most markets but declined 2-4¢ on more selective demand at Minneapolis. Grain sorghum prices went up 2¢ per cwt. and stood at a new crop-year high. In fact, prices were at or near the highest levels in two and a half years. Demand was very strong for the light supplies dribbling into the market.

Soybeans followed a nervous trend most of the week but closed 2-3¢ per bushel higher. Some traders expressed disappointment in the weekly export figures and crushing returns, but this was partly offset by talk of demand from eastern Europe and good domestic demand for light spot offerings. Flaxseed held steady in light trading at Minneapolis.

Grains - export prices at specified points	2
Wheat - inspected receipts by class at selected markets, November	6-7
Grains - inspected receipts at selected markets, November	8-9
Grains - U. S. exports, November	10
Wheat - supply and distribution, monthly	10
Grains - CCC dispositions	11
Feed grains - CCC sales against Certificate Pool	12

32,980,064 POUNDS OF BULGUR ... processed from privately-owned hard red winter or hard red spring wheat were purchased by CCC. Of the total quantity, 32,900,000 pounds will be distributed through U. S. voluntary agencies for donation overseas, with the remaining 80,064 pounds for domestic donation.

Food for Peace Authorizations
January 3-9, 1964

Country	Date	Number	Commodity	Quantity:	Market Value
				Metric	1,000
				tons	dollars
Israel	Jan. 6	16-134	Wheat <u>1/</u>	70,000	4,500
Paraguay	" 9	36-09	Wheat <u>1/</u>	25,000	1,500
Republic of Congo:	" 9	55-40	Wheat flour	15,000	1,300

1/ Hard red spring, hard red winter, and mixed wheat.

Grains: Export prices basis prompt or 30-day shipment, January 9, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>	Price	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum <u>2/</u>
	Grade				
			--Dollars--		
Baltimore	No. 2 Red Winter	2.44	1.39	2.95	1.27
Gulf	No. 1 Hard Winter				
	Ordinary protein	2.42	1.38	2.94	2.25
	14% protein	2.50	-	-	-
Pacific Northwest	No. 1 Western White	2.29	-	-	1.20

1/ Does not include the export payment rate for wheat which on January 9, was 65¢ per bushel for red winter from Baltimore and hard winter from the Gulf and 55¢ for soft white from the West Coast.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

GRAIN MARKETS SHOW MIXED TREND

Spring wheat and soybeans closed a little lower for the week ended January 16. Other cash grain prices were mixed but generally not more than 1 or 2¢ above or below a week ago.

Winter wheat showed little or no change. Country selling increased, but boxcar shortages limited terminal receipts. Mills, merchandisers, and exporters actively sought supplies. Spring wheat lost 4¢ per bushel and durum weakened at Minneapolis. Mill buyers were looking for spring wheat but had lower price ideas. Durum was marketed in a larger volume, but poor milling qualities were slow movers. White wheat edged up 2¢ behind active export demand for rapidly dwindling supplies in the Pacific Northwest. Rye moved up 2¢ at Minneapolis, influenced by potential export business and small farm stocks.

Corn held firm but showed signs of a weaker undertone at the close as demand slacked off at some markets. Oats finished about steady as demand kept pace with offerings. Barley advanced 2-4¢ on limited offerings at Minneapolis but held about steady elsewhere. Grain sorghum prices were little changed with demand good. Country selling picked up but most offerings were taken locally and not much sorghum was offered at terminals.

Cash soybeans fluctuated along with the futures markets and closed 2-3¢ per bushel lower. Demand was strong, but conversion ratios, export figures, statistical interpretations and projections, and action in oil and meal markets also were influencing factors. Flaxseed went up 2¢ at Minneapolis.

WHEAT SALES TO COMMUNIST BLOC COUNTRIES ... total a little over 1.2 million tons on the basis of registrations under the Department's payment-in-kind program. Of this 200,000 long tons (7.5 million bushels) of soft red winter or white wheat were sold to Hungary. By the middle of January most of this had been shipped. East Germany purchased 448,000 bushels of red winter wheat for December-January shipment. The largest sale registered was 37.3 million bushels to the Soviet Union. Of this 18.4 million were hard red winter, 12.9 million durum and 5.5 million bushels soft white or hard red winter. Czechoslovakia purchased 16,000 long tons (600,000 bushels) of hard red winter and 16,000 long tons of soft red winter.

PRICE SUPPORT ACTIVITIES ... through December showed that farmers put 146.9 million bushels of 1963-crop wheat under price support. This is only slightly above the previous month but is nearly 70 million below a year ago. Of the quantity put under support farmers had repaid loans on 36.5 million bushels. Repayments of loans in million bushels for selected States were: Kansas 7.3; Washington 6.5; Oklahoma 4.2; Ohio 3.2; North Dakota 3.0; Oregon 2.3; Michigan 1.9; Montana 1.6; Idaho 1.1; Nebraska 0.9; Texas 0.8 and Illinois 0.7. Farmers put 156.3 million bushels of 1963-crop corn under price support through December 31 as against 135.3 million a year earlier. A total of 50.3 million bushels of soybeans were put under support compared with 48.6 million in the year before. Nearly 54 million cwt. of grain sorghum were put under support by the end of December -- about 25 million less than a year earlier.

Grains: Export prices basis prompt or 30-day shipment, January 16, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

1/ Based on marketing year July 1 for barley, oats and grain sorghum; October 1 for corn.

In some weeks adjustments have been made, so the reported weekly sales do not necessarily add to cumulative sales.

Net value of 1962 and 1963 Feed Certificate Pool remaining for liquidation on January 10, totaled \$807,355,274.

SOYBEANS DOWN - OTHER GRAINS ABOUT UNCHANGED

Cash grain markets generally fluctuated within narrow limits during the week ended January 23. Soybeans, however, dropped sharply. Trading was generally light and offerings at most markets were limited.

Winter wheat prices were mostly unchanged to 2¢ lower. Overseas buyers continued to furnish the big outlet for cash wheat since domestic interest was rather light. Some concern was reported over whether facilities could handle much more grain for export since both United States and Russian ports are heavily congested. Some damage to the winter wheat crop was reported due to high winds and alternate freezing and thawing. Spring wheat prices were unchanged from a week ago with heavy movement against previous contracts. Durum wheat closed 1¢ lower as demand was a little easier. White wheat in the Pacific Northwest was under pressure of a congested condition at the terminal and prices dropped 4¢ per bushel. Hard wheats in this area dropped 2¢ due to slow exports and domestic mill activity. At Minneapolis rye advanced 1¢ per bushel with a slightly improved demand.

Corn prices averaged about unchanged with higher prices at Omaha and Minneapolis offset by losses at Chicago and St. Louis. Demand was generally good for dry corn, but high moisture corn moved slowly. Export demand continued good. The oats market was easy and prices were unchanged. Trading continued light. Barley advanced 2-4¢ at Minneapolis with an improved demand. Prices declined 2-3¢ at Portland where export demand was slow. Grain sorghum prices were unchanged from a week ago with a fair demand for moderate offerings.

Soybeans declined 5-6¢ per bushel reflecting disappointment in the smaller crush in December and a weakened market for oil and meal. Crushings during December totaled 39.2 million bushels compared with 42.8 million in December, 1962. Demand was good for very light offerings. Flaxseed markets were slow with buying discouraged by the slow pace of meal and oil sales.

Soybeans and flaxseed - supply and distribution, monthly	11
U. S. Wheat - inspections for export by classes, Baie Comeau, Canada, December	11
Grains - U. S. imports, November	12

NEW STANDARDS FOR WHEAT ... were announced January 22 to become effective May 1. The following principal changes are being made: Maximum limits are set for "total defects" -- damaged kernels, foreign material, and shrunken and broken kernels. The change sets limits for total defects in grade No. 1 at 3 percent, in grade No. 2 at 5 percent. Limits for shrunken and broken kernels are lowered from 5 to 3 percent for grade No. 1. Limits are set at 12 percent for grade No. 4 and 20 percent for grade No. 5. Minimum moisture content for wheat graded "tough" is reduced from 14 or 14.5 percent (depending on the class) to 13.5 percent for all classes. "Dockage" is recorded in half percent, whole percent, or whole and half percent, with other fractions reduced to the nearest whole or half. Dockage is material other than wheat which may be removed readily by cleaning. Percentages of White Club Wheat and Common White Wheat in the subclass Western White Wheat are to be stated on inspection certificates. During a transitional period following May 1, grain inspectors will -- on request -- show the grade of wheat under the old as well as the new standards. Copies of the amended standards may be obtained from the Director, Grain Division, Agricultural Marketing Service, U. S. Department of Agriculture, Washington, D.C. 20250.

Food for Peace Authorizations and Agreement January 10-22, 1964

Country	Date	Number	Commodity	Quantity	Market Value
				Metric tons	1,000 dollars
<u>AUTHORIZATIONS</u>

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

QUARTERLY
SUMMARY
AND
STATISTICS

GRAIN DIVISION

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 7 No. 1

Washington, D. C. 20250

January 27, 1964

Grain prices generally averaged above a year ago during the last quarter of 1963 reflecting mainly the good export demand. Feed grain stocks on January 1, 1964, were 2 percent above a year earlier, soybean stocks set a record high, but wheat holdings were 11 percent below a year ago. Despite record supplies, soybean prices in January were sharply above last year while most other grain prices were only slightly different from a year ago.

WHEAT ... prices at the farm averaged 5¢ per bushel below the previous year during the last quarter of 1963. The farm price does not reflect the payment of 18¢ per bushel to farmers complying with acreage cutbacks. Ordinary protein hard spring and winter wheats averaged at about last year's level. However, due in part to larger supplies, high protein wheats in January were 14-18¢ per bushel below a year earlier. Reflecting the high export demand red winter and white wheats were well above last year. Record supplies of durum resulted in a drop of 25¢ in prices from a year ago. Stocks of wheat in all positions on January 1 totaled 1.6 billion bushels, the smallest January 1 holdings since 1958. Of the total stocks, Commodity Credit Corporation owned 950 million -- 8 million less than a year ago. Farmers had only 110 million bushels of 1963-crop wheat under price support at the end of December -- 100 million less than a year earlier. Exports of wheat and flour, July through December, totaled a record of nearly 390 million -- 110 million above the year before. Milling of wheat for flour at 310 million was the largest since 1947. Wheat supplies in Canada for 1963-64 are a record high of 1,212 million bushels. Canadian exports of wheat and flour totaled 255 million August through December this year as against 144 million the same months of 1962.

RYE ... prices averaged sharply above last season due to the smaller supplies and the second largest exports in five years. Prices at Minneapolis in January averaged 9¢ per bushel above a year earlier. Rye stocks of 14.8 million were the smallest since 1953 and 37 percent below last year. Exports of 5.8 million, while only half those of a year earlier, were well above average. Other disappearance was near average. Less than a million bushels of 1963-crop rye were under price support at the end of December as against nearly 5 million a year earlier.

CORN ... prices at the farm averaged 9¢ per bushel above a year earlier the first quarter of the season reflecting mainly the record exports. Market prices in January were at about last year's level due in part to a slackening in export demand and relatively unfavorable feeding ratios. Stocks of corn in all positions on January 1 totaled 4,353 million bushels -- 3 percent more than a year earlier. The larger stocks reflect the record crop since the carryover at the beginning of the season was 324 million below a year ago. Of the total January 1 stocks, CCC owned 794 million bushels -- 164 million less than the year before. CCC sales of corn totaled 88 million October through December this season as against 176 million last season. Record exports of 142 million the first quarter were 40 million

above the previous record a year earlier. Around 850 million bushels of corn were fed the first quarter -- well below the year before and the 5-year average. The number of grain consuming animal units fed in 1963-64 is currently estimated at 171.9 million compared with 173.2 million in 1962-63 and 166.0 million the 5-year average. On this basis 4.9 bushels were fed the first quarter this year as against 5.2 last year and 5.3 bushels the average.

CATS ... prices averaged slightly below last season due mainly to the smaller demand. Market prices in January at Minneapolis and Chicago were below last year but at Portland were higher. Stocks of 773 million on January 1 were 2 million more than a year earlier but 11 percent below average. Disappearance mainly for feed, July through December, totaled 484 million -- the smallest in over 20 years. Exports of less than 4 million bushels were the smallest since 1954. Supplies of oats in Canada for 1963-64 at over 603 million bushels were slightly above last year's near-record supply.

BARLEY ... prices at the farm, October-December, averaged 3¢ per bushel above the same months a year earlier. Market prices in January for malting barley were at about last year's level in Minneapolis. However, feed prices at this market were 4¢ lower but on the West Coast ranged 2-4¢ higher than a year ago. Stocks in all positions on January 1 at 329 million were the smallest since 1956. Disappearance of 223 million the first half of the season was 8 million above the previous season. Exports of 28 million were down by 10 million. Imports of nearly 6 million were up sharply from last season but with that exception, the smallest in more than ten years. Supplies of barley in Canada for 1963-64 at 310 million are 86 million above 1962-63.

GRAIN SORGHUM ... prices at the farm averaged 12¢ per cwt. above a year ago the first quarter of the season. Market prices in January were 3¢ lower at Kansas City but 20¢ per cwt. higher at Ft. Worth and 14¢ higher at Los Angeles. Stocks of 572 million cwt. were only slightly less than last year but 105 million cwt. above the 5-year average. Of the total stocks, CCC owned 321 million with an additional 68 million under loan or resale. Exports of nearly 18 million cwt. the first quarter were 1.2 million above a year earlier. The quantity remaining for feed at 102 million cwt. was the largest of record.

SOYBEAN ... prices at Illinois points the first quarter averaged 29¢ per bushel above the same months last year due mainly to heavy domestic and export demand. Prices in January were 19¢ above a year ago. Stocks of 559 million bushels on January 1 were the largest of record and nearly 30 million above the previous high. Crushings of 119 million the first quarter were 6 million below last year's record. Exports of 63 million were also 5.5 million below the 1962 record for the first quarter. Through December 31, farmers put 50 million bushels of 1963-crop soybeans under price support, slightly more than the year before. Soybean oil prices at the beginning of the season were above last year but in December and January averaged below. With meal prices only moderately above last year the processor's margin has averaged smaller than last year.

NOTE: The quarterly supply and distribution table for soybeans was omitted from this report. It is planned to omit it in future reports.

GRAINS: MONTHLY AVERAGE CASH PRICES

(All prices in cents per bushel except grain sorghum in cents per cwt.)

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Does not include Canadian wheat milled in bond, but includes about 10,000,000 bushels of wheat used annually for breakfast food.

4/ Mostly quantity fed, but includes industrial use, waste, loss, and statistical errors in estimates.

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Includes cleaning loss, waste, and statistical errors in estimates.

4/ Less than 1,000 bushels.

FLAXSEED ... averaged \$3.11 per bushel at Minneapolis the first part of January compared with \$3.08 a year earlier. Flaxseed stocks of 29.5 million were 5 million above a year ago and nearly 9 million more than average. Of the total stocks on January 1, CCC owned 1.6 million while over 10 million were outstanding under price support. Exports of flaxseed, July through December, of 2.4 million were below the previous year and the average. Crushings of about 9 million were also below last year and the average. Flaxseed supplies in Canada for 1963-64 total 25 million as against 21 million for 1962-63.

NOTE: Data on stocks, production and seed usage from Crop Reporting Board; imports, exports and quantity of wheat, rye, soybeans, and flaxseed processed from Census Bureau; and alcohol usage from Internal Revenue Service. October-December 1963 data partly estimated.

Grains: Quantity outstanding under support and owned by CCC compared with total stocks, January 1, 1964 and 1963
(Data in 1,000 bushels except grain sorghum in 1,000 cwt.)

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 12 No. 5 Washington, D. C. 20250 January 31, 1964

MOST GRAIN MARKETS WEAKEN

Cash grain prices generally declined during the week ended January 30. Soybeans and flaxseed showed the greatest loss, but most other grains were 1-2¢ below a week ago. Trading was light, but offerings were somewhat larger than the previous week.

Winter wheat prices were mostly 1-3¢ per bushel below a week ago. Export demand continued good but offerings from the country were ample. Domestic demand remained light. Crop reports again stressed danger from a lack of moisture in the Great Plains area. Spring wheat declined 1-2¢ per bushel. New export business was reported slow and domestic flour business remained dull. Prospect's of large export sales of flour failed to materialize. Durum wheat prices remained at last week's level with the market quiet. Most of the heavy movement of durum wheat was for export commitments. White wheat advanced 3¢ per bushel in the Pacific Northwest, reflecting improved demand for limited supplies. Export sales were moderate. Rye declined 4¢ per bushel as rumors of export trade were not realized.

Corn prices generally declined 1-2¢ per bushel with only a limited interest for moderate offerings. CCC offerings remained light but country bookings were at a steady rate. Oats declined 1-3¢ per bushel reflecting in part an adjustment in the quoted prices. Demand was moderate for light receipts. Barley prices were 4-6¢ lower for intermediate and lower grades at Minneapolis but 2¢ higher for the top grades. Buyers were quite selective. Prices on the West Coast were mostly 1-2¢ per bushel below a week ago. Grain sorghum advanced 1¢ per cwt. under good demand for tight supplies.

Soybeans declined 4-5¢ during the week with prices somewhat lower in the middle of the period. The market closed on a somewhat stronger tone. Export sales were fair but prices of oil remain low resulting in below average processor margins. Country selling remained light. Flaxseed went down 5¢ reflecting slow demand for end products.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

February 7, 1964

WHEAT PRICES ADVANCE - OTHER PRICES ABOUT UNCHANGED

Cash grain markets were steady to higher during the week ended February 6. Wheat prices were higher following improved export demand while other grain prices were about unchanged. Trading was moderate with offerings generally in line with the good demand.

Winter wheat prices were mostly 1-2¢ per bushel above a week ago. Additional sales to the Soviet Union and other export demand provided the principal strength to the market. Domestic demand was also good which provided outlets for liberal offerings. Heavy snow in much of the Great Plains area improved crop prospects. Spring wheat advanced 2-3¢ reflecting improved buying for both domestic and export use. Durum strengthened with the additional sale of 7 million bushels for export. Soft white wheat was mostly unchanged in the Pacific Northwest with continued heavy export bookings and liberal offshore flour relief orders. Rye closed at last week's level with little activity in the market.

Corn prices averaged about unchanged with higher prices at Chicago about offsetting lower prices at Minneapolis and St. Louis. Processor demand was steady while offerings were moderate. Oats declined 1¢ at Chicago but advanced 1¢ at Minneapolis. Trading remained light. Barley was mostly unchanged at Minneapolis with a fairly good demand for large receipts. Prices were lower at Portland and Los Angeles. Grain sorghum held steady at Ft. Worth in slow trade but dropped 2¢ per cwt. at Kansas City with moderately heavier offerings.

Soybean markets improved slightly during the week with prices 1-2¢ per bushel above a week ago. A good export demand was the principal strengthening factor. Oil prices were somewhat above a week ago while soybean meal was slightly lower. Flaxseed continued at last week's level at Minneapolis with limited demand for end products.

WHEAT SALES TO COMMUNIST BLOC COUNTRIES ... total a little over 75.2 million bushels on the basis of registrations under the Department's Payment-in-Kind Programs. Sales during the week of over 26 million to the Soviet Union brought the total to 63.2 million bushels. Of this around 20.8 million were durum wheat and the bulk of the remainder hard winter. Additional sales to East Germany brought the total to 3.3 million -- the bulk of which is soft red winter or white wheat. Czechoslovakia purchased 1.2 million bushels of wheat of which one half was hard winter and the other half soft red winter. Sales of 7.5 million bushels to Hungary, previously reported, were soft red or white wheat. Most of this has been shipped. Shipments to the Soviet Union for the week ended January 31 totaled 737,000 bushels of which 248,000 were durum and 489,000 hard winter.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

WEEKLY
SUMMARY
AND
STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 12 No. 7

Washington, D. C. 20250

February 14, 1964

GRAIN PRICES MOSTLY LOWER - WHEAT MIXED

Cash grain markets generally weakened during the week ended February 13. Wheat prices were mixed while most other grains declined. Demand for winter wheat was active, but interest in feed grains and soybeans limited.

Hard winter wheat prices were about unchanged as export needs provided broad outlets. Domestic demand continued good. Country movement of wheat slackened as supplies on farms and interior elevators tapered off. Last week's moisture in the High Plains area revived crop prospects. Red winter wheat prices were mostly 2¢ higher due to a somewhat tight supply situation. Spring wheat declined 4-5¢ per bushel reflecting only a limited demand for somewhat larger offerings. Mill was light. Durum prices advanced early in the period but declined to last week's level at the close. White wheat in the Pacific Northwest declined 1¢ with export trade moderate. Congestion has eased and the embargo was lifted on export wheat in the Pacific Northwest. Rye declined 4¢ with very limited interest.

Corn prices declined 2-3¢ per bushel due in part to a lack of export demand. Domestic interest continued very good for the rather light offerings. Oats declined 1-3¢ with only a light demand for limited offerings. Processor interest was negligible. Barley declined 4-5¢ at Minneapolis where demand was quite slow. Prices on the West Coast were unchanged to slightly lower. Grain sorghum prices were about unchanged with very light offerings ample for the poor demand.

Soybean prices declined 3¢ per bushel reflecting the very poor domestic inquiry. Oil prices were about steady but meal declined \$2.00 per ton during the week. Producers continued to hold on to their supplies and trading was very light. Flaxseed market was unchanged and very quiet.

Special Features

	<u>Page</u>
Food for Peace Authorizations and Agreement	2
Grains - export prices at specified points	2
Wheat - inspections for export by classes, programs, coastal areas, and country of destination, January	6-8
Wheat - inspections for export by classes and ports, January	9
Grains - inspections for export by coastal areas and country of destination, January	10
Grains - inspections for export by ports and areas, January	11
Feed grains - CCC sales against Certificate Pool	12

WHEAT EXPORTS ... continue at record levels with over 21 million bushels inspected for export the week ended February 7. A record 62.5 million bushels of wheat were inspected for export during January somewhat above December and well above a year ago when the dock strike was in progress. Exports of wheat and flour July through December now total around 460 million bushels -- 165 million more than in the same months of 1962-63. The total last season was 637 million.

COUNTY AND TERMINAL PRICE-SUPPORT RATES FOR 1964-CROP RYE ... were announced on February 10, 1964. Rates are based on the 1964-crop national average support price of \$1.07 per bushel, unchanged from 1963, for rye grading No. 2 or better.

Food for Peace Authorizations and Agreement, February 7-12, 1964

Country	Date	Number	Commodity	Quantity	Market Value

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

GRAIN MARKETS MIXED

Cash grain markets showed a mixed trend during the shortened week ended February 19. Wheat, rye and soybean prices declined while corn and flaxseed prices generally advanced. Trading was generally light with rather limited offerings.

Winter wheat prices declined 1-4¢ per bushel reflecting in part improved prospects for the 1964 crop. Export interest lagged with improved prospects for the 1964 wheat crop in Europe and the refusal of dock workers to load foreign boats going to the Soviet Union. Offerings of grain from the country continued light. Spring wheat was unchanged to 1¢ lower with demand very slow. Receipts, mainly of durum wheat, continued rather high. Durum wheat declined 2¢ from a week ago. Wheat markets in the Pacific Northwest were steady to higher despite the smaller export trade. Rye dropped 4¢ at Minneapolis reflecting disappointing export business.

Corn prices generally advanced 1-2¢ per bushel reflecting improved domestic demand for rather light offerings. Export interest continued moderate. Oats were mostly unchanged to 1¢ higher. Demand for meager offerings was steady. Barley markets were weak with prices unchanged to 2¢ lower. Buying interest lacked vigor. Grain sorghum held steady at Ft. Worth but declined 1-2¢ at Kansas City despite smaller offerings.

Soybean prices declined 2¢ per bushel reflecting the poor processor demand. Soybean meal prices also declined during the week. Processor margins continued well below last year and the average. Flaxseed gained 3¢ per bushel at Minneapolis.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Wheat and flour - U. S. exports by country of destination, July-December..	6-7
Wheat flour - U. S. exports by customs districts, July-December 1963	8-11
Barley, barley malt, oats, rye and flaxseed - U. S. exports by country of destination, July-December	12
Feed grains - CCC sales against Certificate Pool	13
Soybean prices compared with soybean oil and meal prices	13
Wheat - supply and distribution, monthly	14
Food for Peace Authorizations and Agreements	14
Wheat and flour - export program rates	15
Wheat, rye, corn, oats, barley, grain sorghum, soybeans and flaxseed - quantity put under price support and outstanding by States	16-23
Grains - quantity under price support	24

EFFECTIVE DATE OF REVISED WHEAT STANDARDS ... were postponed until June 1. The new standards were to become effective May 1, but the one-month postponement will permit more orderly liquidation of the May "futures" contract and provide more time for changes in procedures and adjustments in the price support program.

PRICE SUPPORT ACTIVITIES ... through January 31 showed that farmers put 320 million bushels of 1963-crop corn under price support. This compares with 353 million in the same period last year and 287 million by the same date two years earlier. By the end of January farmers had put 164.2 million bushels of 1963-crop wheat under support. This compares with 273 million put under through January 31, 1963 and 267 million through January 31, 1962. By the end of January farmers had repaid loans on 59 million bushels of wheat. Most of the repayments in million bushels were in the following States: Kansas 14.0; Washington 9.2; Oklahoma 5.9; North Dakota 4.5; Ohio 4.0; Oregon 3.3; Montana 3.1; Michigan 2.4; Nebraska 2.3; Idaho 2.0; Texas 1.2; Missouri 1.1 and Illinois 1.1.

Wheat: Inspected for export to Communist-Bloc Countries 1/

Country	Hard Red Winter	Durum	Soft Red Winter	White	Total
Soviet Union ...	3,655	2,111	--1,000 bushels--	1,711*	7,477
East Germany ...	-	-	655	115	770
Czechoslovakia ..	-	-	657	-	657
Hungary	-	-	2,006	2,073	4,079
Total	3,655	2,111	3,318	3,899	12,983

1/ Inspections for export, in bushels, were as follows: Hungary 3,419,000 in December, and 660,000 in January; Soviet Union 737,000 in January, 2,141,000 ending February 7, and 4,599,000 February 14; East Germany 658,000 February 7, and 112,000 February 14; Czechoslovakia 250,000 February 7, and 407,000 week ended February 14.

*White wheat from the West Coast.

Grains: Export prices basis prompt or 30-day shipment, February 19, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u> Grade	Price	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum <u>2/</u>
			-- Dollars --		
Baltimore	No. 2 Red Winter ...	2.42	1.39	2.83	1.25
Gulf	No. 1 Hard Winter				
	Ordinary protein	2.42	1.38	2.83	2.26
	14% protein	2.49	-	-	-
Pacific Northwest ..	No. 1 Western White:	2.29	-	-	1.12

1/ Does not include the export payment rate for wheat which on February 19, was 62¢ per bushel for red winter from Baltimore and hard winter from the Gulf and 51¢ for soft white from the West Coast.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

February 15, 1963	0	26,567	6,396	1:	252	313,866	158,750	133

1/ Based on marketing year July 1 for barley, oats and grain sorghum; October 1 for corn.

In some weeks adjustments have been made, so the reported weekly sales do not necessarily add to cumulative sales.

Net value of 1962 and 1963 Feed Certificate Pool remaining for liquidation on February 14, totaled \$807,835,867.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Jan. 1964	Dec. 1963	Nov. 1963	Jan. 1963
Soybean Oil:					
Average price at crushing plant	Cents per lb.	8.1	8.2	9.1	8.8
Value from bushel of soybeans 1/	Dollars	0.89	0.90	1.00	0.94
Soybean Meal, 44%:					
Bulk price at Decatur	Dollars per ton	77.45	77.25	74.70	71.85
Value from bushel of soybeans 1/	Dollars	1.86	1.85	1.79	1.69
Value of oil and meal from bushel of soybeans 1/	Dollars	2.75	2.75	2.79	2.63
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.71	2.71	2.72	2.55
Spread between soybean price and value of oil and meal	Cents	4	4	7	8

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

United States Wheat: Supply and Distribution

Item	1963-64	1962-63	1957-61 Average
--Million bushels--			
Carryover stocks, July 1	1,194.9	1,321.9	1,162.0
Production	1,137.6	1,093.7	1,225.3
Total Supply	2,332.5	2,415.6	2,387.3
Estimated quantity for feed, seed and industrial use for season <u>1/</u>	115.0	81.8	100.4
Quantity remaining for milling, export, or carryover	2,217.5	2,333.8	2,286.9
Disappearance July through January:			
Milled for flour	<u>2/</u> 356.3	350.1	344.5
Exported as grain	<u>2/</u> 401.4	245.7	246.6
Total milled and exported	757.7	595.8	591.1
Balance on February 1 for milling, export, or carryover ..	1,459.8	1,738.0	1,695.8
Supplementary information:			
Imports, July-January	<u>2/</u> 1.5	1.7	3.8
Exports of flour in grain equivalent, July-January	<u>2/</u> 56.0	48.9	50.5

1/ Includes an estimate for breakfast food which is not included in quantity of wheat milled for flour. Does not include imports, the major portion of which is used for feed. 2/ Data for January estimated.

Food for Peace Authorizations and Agreements, February 13-18, 1964

Volume 12 No. 9

Washington, D. C. 20250

February 28, 1964

WHEAT PRICES LOWER

Cash grain markets were somewhat mixed during the week ended February 27. Wheat and rye prices dropped sharply but corn closed somewhat higher than a week ago. Other grains closed at about last week's level.

Hard winter wheat prices dropped 2-3¢ per bushel reflecting mainly the poor export outlook. European 1964 wheat crop conditions were reported as improving with prospects more favorable for both Western and parts of Eastern Europe. Recent moisture has improved conditions in the hard winter wheat area of this country. Export trade was extremely quiet while domestic demand remained slow. Red winter wheat prices dropped 9-10¢ per bushel with practically no export interest. Spring wheat dropped 4¢ per bushel with mills not anxious to build up inventory to carry over into new-crop supplies. Early weakness was attributed to the longshoreman's boycott and prices failed to recover since export demand did not materialize. Durum wheat was also easier and prices ranged from 1-3¢ under a week ago. Wheat prices in the Pacific Northwest dropped 5-6¢ reflecting slow export and domestic buying. Rye prices dropped 4¢ with the market easier and unsettled reflecting the softer wheat market.

Corn prices generally advanced 1-2¢ per bushel as light offerings were quickly taken by the relatively good demand. Country offerings continued light. Oats were mostly unchanged to 1¢ lower as demand continued light for moderate offerings. Barley market held fairly steady at Minneapolis but dropped 2¢ in the Pacific Northwest. Good malting barley sold well but feed barley was slow to move. Grain sorghum weakened with prices 1-2¢ per cwt. below a week ago. Trading was extremely dull.

Soybean markets were rather easy during the week with processor demand slow. Crushings continued on a reduced scale with less than 36 million bushels crushed in January compared with 42.8 million in January 1963. Crushings, October through January, at 155 million are 13 million bushels less than the same period a year ago. Prices were about unchanged from a week ago. The flaxseed market held firm with prices unchanged at Minneapolis.

Special Features

	Page
Grains - export prices at specified points	2
Wheat - inspected receipts by class at selected markets, January	6-7
Grains - inspected receipts at selected markets, January	8-9
Wheat - supply and distribution in four exporting countries	10
Soybean prices compared with soybean oil and meal prices	11
Soybeans and flaxseed - supply and distribution, monthly	11
Feed grains - CCC sales against Certificate Pool	12

WHEAT SUPPLIES ... available in the four principal exporting countries, United States, Canada, Australia and Argentina for export or carryover on February 1 totaled 2.4 billion bushels. This is 73 million less than a year ago and 60 million less than on February 1, 1962. Available supplies in United States at 1.3 billion were 266 million below a year ago while Canadian supplies of 774 million on February 1 were 122 million more than a year ago. Supplies in Argentina of 128 million at the first of February reflect the sharply increased production. This season's crop of 260 million compares with 190 million produced in 1962-63. Another large crop in Australia helped boost supplies for the season. However, heavy exports reduced the exportable supplies available on February 1 to 214 million which are somewhat below those available a year earlier. Exports of wheat and flour, in grain equivalent, from the four countries totaled around 960 million bushels, July through January this season. This is around 360 million more than in the same period last season.

OFFERS OF 32,007,564 POUNDS OF BULGUR ... to be processed from privately-owned hard red winter or hard red spring wheat, for sale to CCC were announced recently. Of the total requested, 31,677,500 pounds are for donation overseas through U. S. voluntary agencies, and 330,064 for domestic school lunch program and welfare outlets. So far, a total of 305,642,088 pounds has been obtained for domestic and foreign donation through 10 previous purchases under this program. This quantity is in addition to 339,965,400 pounds processed from wheat owned by CCC for donation abroad, including A.I.D. programs. Approximately 12.3 million bushels of wheat have been required to process the bulgur donated under these two programs.

FOOD FOR PEACE AUTHORIZATION 46-101 ... was issued February 19, under Title I, PL 480, to the United Arab Republic, to finance the purchase of \$5,560,000 worth of yellow corn, (approximately 100,000 metric tons) grade U. S. No. 2 or better, in bulk, from U. S. suppliers.

Grains: Export prices basis prompt or 30-day shipment, February 27, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

1/ Estimated requirements for seed, food (milling for domestic use), and feed for the season. 2/ Exports of wheat and flour in grain equivalent.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Feb. <u>2</u> / 1964	Jan. : 1963	Dec. : 1963	Feb. 1963
Soybean Oil:					
Average price at crushing plant	Cents per lb.	8.0	8.1	8.2	8.7
Value from bushel of soybeans <u>1</u> /	Dollars	0.88	0.89	0.90	0.93
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	74.35	77.45	77.25	72.55
Value from bushel of soybeans <u>1</u> /	Dollars	1.78	1.86	1.85	1.70
Value of oil and meal from bushel of soybeans <u>1</u> /	Dollars	2.66	2.75	2.75	2.63
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.65	2.71	2.71	2.59
Spread between soybean price and value of oil and meal	Cents	1	4	4	4

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64. 2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Soybeans and Flaxseed: Supply and distribution

Item	Soybeans		Flaxseed	
	1963-64	1962-63	1963-64	1962-63
	-- 1,000 bushels --			
Carryover <u>1</u> /	15,055	57,565	8,388	3,608
Production	701,465	669,211	31,481	32,230
Total supply <u>2</u> /	716,520	726,776	39,869	35,838
Adjusted total supply <u>3</u> /	716,520	716,276		
Disappearance through January 31: <u>4</u> /:				
Seed, feed and residual <u>5</u> /	47,000	46,400	2,500	2,221
Crushed for oil or processed	155,123	168,340	10,571	12,232
Exported	<u>6</u> / 78,897	72,244	<u>6</u> / 2,500	3,426
Total disappearance	281,020	286,984	15,571	17,879
Balance on February 1 for processing, export or carryover	435,500	429,292	24,298	17,959

1/ Soybean stocks as of October 1; flaxseed stocks as of July 1. 2/ Imports not included because negligible. 3/ The soybean supply has been adjusted by subtracting crushings and exports of new-crop soybeans in September and adding an estimate for crushings and exports of new-crop beans the following September. Estimated new-crop crushings and exports were as follows, in million bushels: September 1962 - 17.0; September 1963 - 6.5; and September 1964 - 6.5. No allowance is made for new-crop flaxseed crushed prior to July 1. 4/ Soybeans, October through January; flaxseed, July through January. 5/ For the entire year. 6/ Partly estimated.

WEEKLY
SUMMARY
AND
STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 12 No. 10

Washington, D. C. 20250

March 6, 1964

WINTER WHEAT PRICES SHARPLY LOWER

Cash grain markets were somewhat mixed during the week ended March 5. Winter wheat prices dropped sharply while soybeans, corn and spring wheat closed somewhat higher. Other grains ended at about last week's level.

Hard winter wheat prices dropped 5-6¢ per bushel largely reflecting the poor export interest. European wheat crop prospects continued good with winterkill light. The hard winter wheat crop is encouraging but the sub-soil moisture remains low. Red winter wheat prices dropped 10-11¢ per bushel with local interest limited. Spring wheat advanced 2-3¢ per bushel reflecting light receipts and a moderate demand. Durum wheat quotations were unchanged with demand rather brisk. White wheat dropped 6-7¢ in the Pacific Northwest with small export demand and little interest from flour mills.

Rye declined 1¢ per bushel with the flour trade very quiet. Receipts remained light.

Corn prices generally advanced 1-2¢ per bushel with a relatively good demand for rather light offerings. Lack of moisture in the corn States and the prospect of smaller acreage this year bolstered the market. Oats were mostly unchanged to 1¢ higher with only moderate interest in light receipts. Barley was unchanged at most points but advanced 4¢ at Minneapolis. Strength principally in malting barley stemmed mainly from light receipts. Grain sorghum prices held steady at Kansas City but declined 2¢ per cwt. at Ft. Worth with a very weak undertone prevailing.

Soybean markets strengthened with prices 3-6¢ per bushel above a week ago. Offerings continued light reflecting limited farm selling. Oil and meal prices were also stronger. Flaxseed markets remained steady with prices unchanged at Minneapolis.

SUPPLEMENTAL REPORT ON PRICE SUPPORT ACTIVITIES ... as of February 15 contained more complete data on the quantities of 1963-crop grains put under price-support loans and purchase agreements through January--the close of the period when these supports were available to producers of most crops. Price support remains available for corn through May, so it was not included in the supplemental report. Wheat remaining under price support as of February 15 is at the lowest level in 11 years, while grain sorghum is at the lowest level since the 1959 crop. Of the 171 million bushels of 1963-crop wheat put under price support through February 15, farmers had repaid loans on 65.6 million bushels. Wheat loan repayments, in million bushels, were: Kansas 15.5; Washington 10.0; Oklahoma 6.6; North Dakota 4.9; Ohio 4.2; Montana 3.7; Oregon 3.7; Nebraska 2.6; Michigan 2.5; Idaho 2.3; and Texas 1.4. Farmers also had repaid loans through February 15 on 5 million bushels of barley, 181,000 bushels of flaxseed, 1.5 million bushels of oats, 934,000 bushels of rye, 2.3 million bushels of soybeans, and 960,000 cwt. of grain sorghum.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Washington, D. C. 20250

March 13, 1964

WHEAT PRICES CONTINUE LOWER

Cash grain markets continued slow during the week ended March 12. Wheat and soybean prices were lower while corn and rye advanced somewhat. Other grains closed at about last week's level. Winter wheat prices dropped 2-4¢ per bushel at most Midwest points but lost 7¢ at Ft. Worth. Weakening factors are the reported smaller than expected exports, continued good crop prospects for the 1964 crop and gradual shifting to new-crop price basis. Offerings continued very light but domestic buying was limited. Spring wheat prices declined 3-4¢ per bushel with both domestic and export flour business quiet. Trading continued limited. Durum prices held steady with a fair demand for moderate offerings. White wheat in the Pacific Northwest dropped as much as 14¢ per bushel despite a fair volume of export sales of wheat and a substantial ASCS relief flour order. Rye prices gained 2¢ during the week with offerings scarce and demand generally very narrow.

Corn prices were mostly unchanged to 1¢ higher with country offerings generally very light. Flood waters in many areas reduced available supplies. Some improvement in export activity was reported. Oats were down nearly 2¢ at Minneapolis where receipts were somewhat in excess of demand. Markets were rather dull at other points. Barley prices declined 2-4¢ at Minneapolis with good malting selling fairly well but the lower quality slow to move. Barley prices in the Pacific Northwest advanced 1¢ per bushel. Grain sorghum prices declined 2¢ per cwt. with demand limited for somewhat increased offerings.

Soybean prices declined sharply early in the week with some recovery later but closed 2-4¢ per bushel under a week ago reflecting continued unfavorable processing margins. Exports were at a favorable rate but domestic demand remained light. Offerings from the country were light. Flaxseed edged up 2¢ in very light trading at Minneapolis.

Feed grains - CCC sales against Certificate Pool	12

WHEAT EXPORTS ... continued at a record level in February with 70 million bushels of wheat, grain only, inspected for export. This compares with 62.5 million in January and 53.5 million in February 1963. Of the wheat exports, 17.4 million were shipped to Communist Bloc countries with 13.7 million going to the Soviet Union. Of the total February shipments nearly 10 million were soft winter with 7.2 million soft red and the balance soft white from the East Coast. Hard winter wheat accounted for 44.5 million, spring 2.5 million, and durum 3.4 million bushels. Exports of wheat and flour, July through February, now total 540 million, 180 million more than in the same months of 1962-63. (Details, pages 6-9)

FIRST FEED GRAIN SIGNUP REPORT ... showed that during February 10-27 farmers on 543,534 farms have signed up to divert 10.2 million acres of corn, 2.5 million acres of grain sorghum, and almost 1.0 million acres of barley under the 1964 feed grain program. During the same period last year, 384,762 farms had signed up to divert 7.7 million acres of feed grain cropland under the 1963 feed grain program.

Food for Peace Authorizations, March 6-12, 1964

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

GRAIN MARKETS MIXED

Cash grain markets showed a mixed trend during the week ended March 19. Hard winter wheat prices recovered much of the earlier losses, while spring wheat dropped sharply early in the week. Soybean prices declined while most other grains fluctuated within narrow limits.

Hard winter wheat prices advanced 6-8¢ per bushel. Strength was attributed to very light offerings and improved export demand. Lack of subsoil moisture caused some concern over wide areas of the Southwest. Red winter wheat prices advanced 2¢ at Chicago and St. Louis. Spring wheat dropped as much as 15¢ early in the week and closed 8¢ below a week ago. Weakness was attributed in part to the difficulty in adjusting to the 1964 wheat supplies and the pending wheat legislation. Durum wheat declined 12¢ during the week. Hard winter wheat gained 8-9¢ in the Pacific Northwest while white wheat remained unchanged. Exporters provided the principal support for hard red winter wheat. Rye went up 2¢ with little activity reported.

Corn markets were mostly unchanged to 1¢ higher. Demand improved somewhat but offerings remained very light. A 2 percent reduction from last year was indicated in prospective plantings for 1964. Oats prices were mostly steady during the week with little interest for meager offerings. Barley was mostly unchanged at Minneapolis but advanced 1-2¢ with some export demand at Portland. Grain sorghum markets were firm in very quiet trade with prices about unchanged.

Soybean prices declined 3-4¢ reflecting disappointment in the export movement and continued weakness in the oil and meal market. A record 1964 soybean acreage of 32 million acres, 8 percent above 1963, was indicated by farmers planting intentions. The flaxseed market was quiet with prices unchanged during the week.

Wheat - supply and distribution, monthly	7
Wheat, rye, corn, oats, barley, grain sorghum, soybeans and flaxseed - quantity put under price support and outstanding by States	8-15
Grains - quantity under price support.....	16

PRICE SUPPORT ACTIVITIES ... through February 29 showed that farmers put 357.6 million bushels of 1963-crop corn under price support. This is the smallest amount since 1959 and compares with 464.3 million a year earlier. Farmers put 172.3 million bushels of 1963-crop wheat under support but had repaid loans on nearly 70 million bushels by the end of February. Farmers had also put 72.8 million bushels of soybeans under price support. This is 4 million more than a year earlier but well below the record of 131.3 million from the 1961-crop two years ago. (Details by States, pp. 8-15)

FEED GRAIN SIGNUP REPORT ... showed that during February 10-March 13, farmers on 812,146 farms signed up to divert 20,867,400 acres. Of this, 15 million acres are corn, 4 million grain sorghum and 1.9 million barley. This compares with 13.1 million signed up in a comparable period last year.

WHEAT SHIPMENTS ... to Communist Bloc countries (USSR, East Germany and Czechoslovakia) totaled 4.8 million bushels during the week ended March 13 on the basis of export inspections. This brought the total wheat shipments to these countries to 26.2 million bushels, mostly since February 1.

Food for Peace Authorizations and Agreements, March 13-18, 1964

Country	Date	Number	Commodity	Quantity	Market Value
				Metric tons	1,000 dollars

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

WHEAT UP SHARPLY - OTHER GRAINS LITTLE CHANGED

Wheat prices registered a sharp advance during the week ended March 26. Most other grains, however, showed little or no change.

Hard winter wheat finished 6-9¢ per bushel higher; red winter, 5-7¢ higher. Upturns reflected very active export and mill demand. Primary and secondary owners held stocks tightly and showed little interest in selling. Mills and exporters scrambled for limited offerings and raised bids in an effort to draw out supplies needed to cover earlier overseas bookings of wheat and flour. Spring wheat went up 8¢ per bushel at Minneapolis but the durum market softened. Country selling of spring wheat was slow. While spot wheat found ready outlets, demand was not too broad. Mills and merchandisers held inventories to a minimum and domestic flour business was quiet. White wheat gained 5-6¢ and hard winter moved up 3-4¢ in the Pacific Northwest where relatively light offerings found improved export interest. Rye came down a penny at Minneapolis. Trading was dull, with flour business very quiet and export interest lacking.

Closing corn prices were not more than a cent above or below a week earlier. Offerings were light but ample for current demand. Anticipation of increased marketings with the end of the heavy winter feeding season had a bearish influence. Oats declined a cent or two as demand lagged in spite of scanty offerings. Barley advanced 4-5¢ on anticipated export business in the Pacific Northwest but held about steady on light offerings elsewhere. Grain sorghum went up 2¢ per cwt. in Ft. Worth but lost 1-2¢ in Kansas City. Demand was sluggish in both markets, however, reflecting slow feed trade.

Soybeans edged up 1-2¢ per bushel, supported mainly by light country marketings. Action in oil and meal markets failed to provide much help for spot soybeans, but export inspection figures and a late improvement in processor and exporter buying interest offered some encouragement. Flaxseed lost 4¢ as draggy linseed oil and meal markets limited buyers' needs for light crushing operations.

WEEKLY WHEAT EXPORT INSPECTIONS HIT A RECORD 27.2 MILLION BUSHELs ... during the 7-day period ended March 20. This not only set a new all-time high for the quantity of wheat inspected for export during any previous week, but also nearly doubled the quantity inspected the week before and the same week a year earlier. Of the 27.2 million bushels inspected for export during the week ended March 20, almost 23 million bushels were hard winter wheat, 1.5 million were red winter, 1.1 million were white, 995,000 bushels were durum, and 643,000 bushels were spring wheat. Most of the wheat, or 21.6 million bushels, was inspected for export from Gulf ports. About 2.6 million bushels were shipped through Atlantic Coast ports, and a little more than 3 million bushels from West Coast ports. About 70 percent of the total inspections, or 19.1 million bushels of wheat, were destined for seven countries--the Soviet Union, Poland, United Arab Republic, India, East Germany, The Netherlands, and Japan. Of these countries, the largest quantity of wheat was destined for the Soviet Union--6.6 million bushels. Nearly 5 million bushels were for India, 2.2 million for the United Arab Republic, and 2.1 million for Japan. Most of the wheat going to the Soviet Union, Poland, the United Arab Republic, India, and Japan was hard winter. The Soviet Union also took 800,000 bushels of durum and almost 84,000 bushels of white wheat. About 390,000 bushels of red winter and 54,000 bushels of white wheat were inspected for export to East Germany.

A PRICE-SUPPORT RESEAL PROGRAM ON FIVE GRAINS ... was announced this week. Under the reseal program, farmers can continue price support loans on five farm-stored grains after loan maturity dates in 1964, and earn storage payments. Farmers in many areas will be able to reseal 1963-crop wheat (except durum), corn, barley, oats, and grain sorghum currently under farm-stored loans or purchase agreements. In addition, loans on 1960-crop wheat and corn, 1961-crop wheat, corn, and grain sorghum and 1962-crop barley, wheat, corn, oats, and grain sorghum now under reseal may be extended for another year.

REDUCED GRAIN STORAGE RATES ... under the Uniform Grain Storage Agreement effective for the storage year beginning July 1, 1964, were announced this week. The reduction is one thousandth of a cent per bushel per day for all grains whether stored commingled or identity preserved. Wheat, corn, oats, grain sorghum, barley, rye, soybeans, and flaxseed are the eight grains covered.

Grains: Export prices basis prompt or 30-day shipment, March 26, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}	Corn	Soybeans	Barley
	Grade	No. 2	No. 2	or Grain

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Mar. 2/ 1964	Feb. 1964	Jan. 1964	Mar. 1963
Soybean Oil:					
Average price at crushing plant	Cents per lb.	8.0	8.0	8.1	9.2
Value from bushel of soybeans 1/	Dollars	0.88	0.88	0.89	0.98
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	73.95	74.30	77.45	70.45
Value from bushel of soybeans 1/	Dollars	1.77	1.78	1.86	1.66
Value of oil and meal from bushel of soybeans 1/	Dollars	2.65	2.66	2.75	2.64
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.63	2.65	2.71	2.58
Spread between soybean price and value of oil and meal	Cents	2	1	4	6

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64. 2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Soybeans and Flaxseed: Supply and distribution

Item	Soybeans		Flaxseed	
	Year beginning Oct. 1		Year beginning July 1	
	1963-64	1962-63	1963-64	1962-63
	--1,000 bushels--			
Carryover	15,055	57,565	8,388	3,608
Production	701,465	669,211	31,481	32,230
Total supply	716,520	726,776	39,869	35,838
Adjusted total supply 1/	716,520	716,276		
Disappearance through February 29:				
Seed, feed and residual for season:	42,000	46,400	2,500	2,221
Crushed for oil or processed	189,687	207,147	12,279	13,771
Exported	2/ 95,434	91,506	2,500	3,497
Total disappearance	327,121	345,053	17,279	19,489
Balance on March 1 for processing, export or carryover	389,399	371,223	22,590	16,349

1/ The soybean supply has been adjusted by subtracting crushings and exports of new-crop soybeans in September and adding an estimate for crushings and exports of new-crop beans the following September. Estimated new-crop crushings and exports were as follows, in million bushels: September 1962 - 17.0; September 1963 - 6.5; and September 1964 - 6.5. No allowance is made for new-crop flaxseed crushed prior to July 1.
2/ Partly estimated.

GRAIN MARKETS MIXED

Cash grain markets showed a mixed trend for the week ended April 2. However, closing prices generally were no more than 2 or 3¢ per bushel above or below the previous week's close.

Winter wheat finished on the firm side. Continued light selling by farmers and country elevators was viewed by some traders as an indication that "free" stocks of wheat may be nearing the critical stage. Limited spot offerings found demand good but not as active as the week before. Many buyers were on the sidelines awaiting legislative developments, and domestic flour trade was slow. Spring wheat prices softened at Minneapolis but durum firmed up on extremely light offerings. Spring wheat trading was limited but buyers readily took the skimpy offerings. White and hard winter wheat went up 3¢ in the Pacific Northwest with good demand and tightly held remaining "free" stocks. Rye edged up a couple of cents in light trading at Minneapolis.

Corn held steady. Offerings were light but ample for demand which was tempered to some extent by the dull pace of feeding and large country stocks. Oats finished on a firm note, supported mainly by limited offerings. Barley generally ruled firm, but prices advanced 4¢ in some of the ranges at Minneapolis with sharply reduced receipts the main strengthening factor. Grain sorghum markets were steady in light trading.

Soybeans closed 2-3¢ per bushel lower as action in the oil and meal markets, export figures, and conversion rates were disappointing to many traders. Flaxseed held steady in light trading at Minneapolis.

RECORD ACREAGE DIVERSION SIGNUP ... is indicated for the 1964 Feed Grain Program, according to preliminary figures released this week. Through the March 27 final signup date, 34.3 million acres of corn, grain sorghum, and barley acreage have been signed up for diversion this year. The 34.3 million acres compare with a diversion signup of 25.7 million acres in 1963, 32.6 million acres in 1962, and 26.7 million acres (corn and grain sorghum only) in 1961. Of the 34.3 million acres of signed cropland diversion this year, about 31 million acres were in 21 States -- Alabama, Colorado, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Montana, Nebraska, North Carolina, North Dakota, Ohio, Oklahoma, South Dakota, Tennessee, Texas, and Wisconsin -- each with more than 500,000 acres of feed grain cropland diversion. Another report on the 1964 Feed Grain Program signup will be issued soon. It will contain final figures on participants and individual feed grain acreage diversion.

Food for Peace Authorizations, March 27-April 2, 1964

Country	Date	Number	Commodity	Quantity	Market value
				Metric tons	1,000 dollars
Sudan	Mar. 27	54-06	Wheat <u>1/</u>	26,000	1,900
Rep. of Korea ...	" 27	24-103	Barley <u>2/</u>	25,000	1,280
Rep. of Korea ...	Apr. 2	24-100	Wheat <u>3/</u>	80,000	5,217
Rep. of Korea ...	" 2	24-102	Wheat <u>1/</u>	45,000	3,042

1/ Hard red spring, hard red winter, and mixed wheat.

2/ Malting barley of any type will not be eligible for financing.

3/ White wheat, hard red spring, hard red winter, and mixed wheat.

Grains: Export prices basis prompt or 30-day shipment, April 2, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

WHEAT UP - SOYBEANS AND RYE DOWN

Wheat prices were erratic but closed unevenly higher for the week ended April 9. Rye and soybeans lost price ground, while markets for other cash grains showed little or no change. Legislative and strike news and export trade were major market factors.

Winter wheat ranged steady to 4¢ per bushel higher at the close after early losses were more than offset by late gains. Offerings of "free" wheat remained light, but buyers were not pressing. Strong export interest, threat of a nationwide rail strike (which later was postponed for 15 days), and passage of food stamp and cotton-wheat bills were credited by most traders as supporting factors. Spring wheat went up 4-5¢ but durum was steady to 2¢ lower at Minneapolis. Mill requirements were off as there was little trading in flour. White wheat prices rose 12-13¢ in the Pacific Northwest, reflecting active export trade and continued light country marketings. Rye lost 8¢ per bushel at Minneapolis. Receipts were light, but only scattered sales of rye flour were reported and export outlets were meager.

Corn finished unchanged to 2¢ per bushel higher, supported by light offerings and export competition with processors. Oats held firm largely in sympathy with corn, but offerings were still light. Barley was generally unchanged with a fairly good balance between supply and demand. Grain sorghum prices were not much changed in rather quiet trading.

Soybeans closed about 3¢ per bushel lower. Weekly export inspections of soybeans were considered favorable, but this failed to offset the weakening influence of increased country selling, weakness in products, and light crushings. Flaxseed held steady in light trading at Minneapolis.

Wheat - supply and distribution, monthly	16

A RECORD 83 MILLION BUSHELS OF WHEAT WERE INSPECTED FOR EXPORT ... during March. This was nearly 14 million bushels more than the previous month and almost 11 million bushels more than the old record set in May 1963. Total export inspections from July 1963 through March 1964 now total 553 million bushels--200 million bushels more than the same period a year earlier. Of the 83 million bushels of wheat inspected for export during March, 57 million bushels were hard red winter wheat, 13.5 million were white, 6.6 million were durum, 3.5 million were soft red winter, and 2.7 million bushels were hard red spring wheat. About 65 percent, or 54.6 million bushels, of March wheat export inspections were made at Gulf Coast ports. Nearly 15.7 million bushels were inspected at Pacific ports and 13.1 million at Atlantic ports. About 73 percent of the total wheat export inspections, or 60.7 million bushels, were destined for six countries--The Soviet Union, India, Japan, Poland, The United Arab Republic, and The Netherlands. The Soviet Union took nearly 19 million bushels of hard red winter wheat, 4.0 million bushels of white, 6.4 million bushels of durum, and 116,000 bushels of soft red winter wheat. About 4.4 million bushels of hard red winter, 333,000 bushels of soft red winter, and 200,000 bushels of white wheat went to Poland. East Germany took 474,000 bushels of soft red winter and 154,000 bushels of white wheat. (Inspection for export details on pages 6-11.)

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

Volume 12 No. 16

Washington, D. C. 20250

April 17, 1964

MOST GRAIN MARKETS STRENGTHEN

Cash grain prices generally traveled within a mixed but narrow range during the week ended April 16. Most grains, however, finished on a firm or stronger note. Trading was on the nervous side, with the spot market very allergic to action and influences on the futures market.

Winter wheat was mixed--closing 2¢ per bushel higher to 2¢ lower. Offerings continued very light. Mill demand dulled a little, but export interest held up fairly well. Most traders busied themselves trying to interpret what effect the new wheat program, union concern over loading grain for Soviet countries on 50 percent American ships, and outcome of present rail strike negotiations will have on the market. Stocks, especially of red wheat, also were of major concern. Spring wheat, although losing some of its early sharp upturn, still closed 4-6¢ higher and durum advanced 12¢ at Minneapolis. Demand was good for light offerings. White wheat held steady behind good export demand in the Pacific Northwest. Rye lost 3¢ in light trading at Minneapolis.

Corn edged up 1-2¢ per bushel as country selling remained light and exporters competed actively with domestic users for limited receipts. Oats held steady with light receipts about in line with current demand. Barley markets were mostly unchanged, but prices went up 2-4¢ on lighter receipts at Minneapolis. Grain sorghum finished on a firm note, supported by improved demand.

Soybeans closed unchanged from a week ago. Record high stocks on farms--190 million bushels on April 1--and this year's 8 percent smaller October-February crush discouraged buying. However, the market drew some encouragement from the favorable rate of export inspections and currently light farm selling. Flaxseed held steady in Minneapolis.

Grains - quantity under price support	16

VOLUNTARY 1964 WHEAT PROGRAM...announced this week offers to wheat producers who participate: Payments for diverting wheat acres to conservation uses; price support through loans and purchases; cashable certificates for wheat to be consumed domestically; and cashable certificates for wheat to be sold for export. The program is entirely voluntary. A farmer, whether he agrees to participate in the program or not, is free to sell his entire production to anyone, at any time, and at such prices as he can get. There are no restrictions on sales of 1964-crop wheat. A producer desiring to receive a price-support loan, certificates, and acreage diversion payments can voluntarily sign up to participate and become a cooperator. Signup to qualify for the new program will take place from May 1 through May 15 in ASCS offices throughout the nation. A farmer can cooperate by: (1) Staying within his 1964 acreage allotment which already has had the minimum qualifying acreage diversion deducted; (2) Devoting to conserving use all the diverted land (in addition to maintaining the normal acreage in conserving use); (3) Not exceeding acreage on any other allotment crop on the farm; and (4) Not exceeding the wheat allotment on any other farm in which he has interest in the wheat. A cooperating wheat producer will be eligible for price-support loans at a national average of \$1.30 per bushel on his entire production. In addition, he will receive negotiable certificates based on the normal production of his eligible acreage planted for harvest. The certificates will have fixed face value--70¢ per bushel for the domestic marketing certificates, covering the producer's share in the national marketing allocation for U. S. food wheat production, and 25¢ per bushel for the export marketing certificates, covering his share of the export marketing allocation. Details of the program may be obtained from State and County ASCS offices.

WHEAT MARKETING CERTIFICATES...announced this week under provisions of new wheat legislation will go into effect on domestic wheat processing and wheat exports at the beginning of the 1964 wheat marketing year on July 1.

PRICE SUPPORT LEVEL FOR 1964-CROP SOYBEANS...was announced this week at an average of \$2.25 per bushel. This is unchanged from the 1963 price support level. It represents 74.3 percent of the April parity price of \$3.03 for all soybeans. The 1964 program is substantially the same as that authorized in 1963. Applications for price support will be available through January 31, 1965.

Grains: Export prices basis prompt or 30-day shipment, April 16, 1964

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

GRAIN MARKETS SHOW MIXED TREND

Cash grain markets displayed an irregular trend at the close of the week ended April 23. Wheat and oilseeds chalked up the widest price swings, while feed grains and rye held more stable positions.

Winter wheat finished 2-4¢ per bushel higher in the Southwest and steady or a little weaker elsewhere. Very light offerings found good demand. Exporters were active, and some mills sought good milling quality wheat for current needs. Most mills, however, were interested mainly in new-crop wheat which is expected to be available in early areas within the next four to five weeks. Many mill buyers remained on the sidelines in anticipation of some sort of transition program when the certificate plan of the 1964 Wheat Program goes into effect on July 1. Spring wheat advanced 4¢ but durum declined 2¢ at Minneapolis. Upturn in spring wheat was attributed to increased mill buying and a sharp advance in May futures, while softness in durum reflected slow demand. White wheat held steady in the Pacific Northwest as offerings slackened and pending export trade looked favorable. Rye edged up a couple of cents at Minneapolis with a little better demand for very light offerings.

Corn closed unchanged to 2¢ per bushel higher, supported mainly by continued light country selling and active export demand. Oats were firm with offerings short of spot demand. Barley ruled firm behind good demand at most markets but weakened in California. Grain sorghum, bolstered by good demand for light offerings, went up 3-4¢ per cwt. at Kansas City and 1¢ at Fort Worth.

Soybeans turned downward, finishing around 2-4¢ per bushel lower. Country selling remained very light and export inspections held up fairly well, but these were offset by weaker markets for end products, unfavorable reports on crushings, and an anticipated report of large stocks in all positions. Flaxseed advanced 4¢ in Minneapolis but selling was light.

1964 Feed Grain Program - final signup report	15
Food for Peace Authorizations and Agreements	16

1964 FEED GRAIN PROGRAM FINAL SIGNUP REPORT ... has 1.3 million enrolled farms to divert record 34.3 million acres from corn, grain sorghum and barley production this year. The 1.3 million feed grain farms signed up under the 1964 program represent 41 percent of the 3.2 million eligible feed grain farms in the United States. The 77,502,900 base acres on these signed farms are 59 percent of the 132,427,100 base acres on all eligible farms. The base acreage total includes feed grain acreage set aside under the Conservation Reserve Program. For all farms signed up, estimated total payments for diverting acreage amount to \$923,134,900. Average payment per farm is estimated at \$710, with an average of \$27 per acre diversion payment. In general, provisions for the 1964 program are similar to those for the 1962 and 1963 crops. Diverted acreage signed up for 1964 with 1963 data in parenthesis, follow: Corn 22,978,400 (17,715,729); grain sorghum 6,844,400 (4,904,982); barley 4,488,900 (3,055,753). (Details by States, see Page 15).

MOISTURE PROVISION OF REVISED STANDARDS FOR DURUM WHEAT ... was postponed until June 1, 1965. Other revisions in wheat standards, as announced January 22, will become effective June 1, 1964. The postponement affects the revision which provides that wheat of the class Durum be graded as "tough wheat" if it contains more than 13.5 percent moisture, instead of the present 14.5 percent, and the present requirement that Durum wheat with more than 16 percent moisture be graded "sample".

PRICE SUPPORT LEVEL FOR 1964-CROP FLAXSEED ... was announced this week at an average of \$2.90 per bushel. This is unchanged from the 1963 price support level. It represents 75.9 percent of the April parity price. Texas county and terminal price-support rates for 1964-crop flaxseed, also announced, are unchanged from the 1963-crop rates. For terminal markets at Corpus Christi and Houston, the rate will continue to be \$2.92 for flaxseed grading No. 1 with 10.6-11.0 percent moisture.

WHEAT PRODUCED ... on any farm on which the 1964 wheat acreage is within the farm allotment will be eligible for price support under a recent announcement. Eligibility for price support will be based on each individual farm and not as previously announced under the 1964 wheat program. This does not change requirements for wheat marketing certificates.

Grains: Export prices basis prompt or 30-day shipment, April 23, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

QUARTERLY SUMMARY AND STATISTICS

GRAIN DIVISION

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 7 No. 2

Washington, D. C. 20250

April 30, 1964

Grain prices generally declined during the January-April period with soybeans and wheat showing the sharpest loss. However, corn was an exception with prices strengthening throughout most of the period. Prices in April for corn, grain sorghum and rye and feed grains on the West Coast were higher than a year ago while wheat prices in April averaged about 12¢ below April 1963. Feed grain stocks on April 1 of 129 million tons, were 6 percent above a year ago. Soybean stocks were at a record high, while wheat holdings were 20 percent below a year ago.

WHEAT ... prices declined around 15¢ per bushel from January to March but in April regained part of the loss due mainly to limited supplies of "free" wheat and also to effects of the new wheat legislation. Hard winter wheat prices in Kansas City in April were 1-2¢ per bushel above the January level but ordinary protein averaged 12¢ below April 1963. Despite the gain in April, red winter and spring wheat averaged 8-12¢ per bushel below January. Durum wheat dropped 13¢ during the 4-month period and in April averaged 33¢ below a year ago. Higher protein wheat sold at premiums averaging around 6¢ per bushel this year as against 11-13¢ last year. Stocks of wheat in all positions on April 1 totaled 1,207 million bushels, the smallest holdings since 1958. Of the total stocks, Commodity Credit Corporation owned 898 million -- 50 million less than a year ago. An additional 141 million were outstanding under support or resale, leaving around 168 million bushels of "free" wheat. This compares with 263 million at the same time a year ago. Exports of wheat and flour totaled 625 million bushels, July through March, around 200 million more than the same months last season. Flour millings totaled 463 million the first nine months, about 2 percent above the same period a year ago. Canadian stocks of wheat on March 31 totaled 784 million compared with 669 million a year earlier.

RYE ... prices declined steadily the first four months of the year but the average at Minneapolis for the first three weeks of April was 7¢ per bushel above a year ago. Weakness in rye reflected the small exports. Stocks of 10.8 million in all positions April 1 were the smallest since 1953 and 4.4 million below last year. Exports of 1.5 million the January-March quarter were down a third from last year while the 9-month total of 7.2 million were less than half the previous year. Other disappearance continued at about last year's level. Rye stocks in Canada totaled 11.3 million on March 31 as against only 6.6 million a year earlier.

CORN ... prices at the farm, January through March averaged 4¢ per bushel above last year reflecting in part record exports. Market prices, although dipping slightly in February have been advancing gradually during the period and in April were around 5¢ per bushel above a year ago. Stocks of corn in all positions on April 1 totaled 3,264 million -- 226 million more than a year ago. Farm stocks were at a record high but off-farm supplies were 3 percent less than

The soybean supply and distribution table was omitted from the January 27, 1964 quarterly report. However, due to numerous requests indicating a need for such data the soybean supply and distribution table has been reinstated.

Statistics contained in the supply and distribution tables for all grains represent data reported by several independent sources. Production and stocks for the current report are preliminary and subject to revision. No attempt is made to force a balance between supply and reported disappearance.

last year and the smallest since 1957. CCC owned 788 million on April 1 - about the same as last year. However, farmers had put only 376 million under price support by March 31 this year as against 504 million a year earlier. CCC sales of corn the first six months totaled only 114 million compared with 478 million last season. Disappearance of corn the first half of the season at 2,134 million bushels was about 100 million less than last season. Exports of nearly 260 million, the first six months, were a record high, 75 million more than last year. Over 97 million bushels were used for wet milling -- the largest of record. Corn remaining for feed totaled 1,762 million, nearly 200 million less than in 1962-63. Animal units for 1963-64 are estimated at 170.3 million compared with 173.2 million for 1962-63. Feeding of corn per animal unit totaled 10.3 bushels the first half of the season as against 11.3 last year.

OATS ... prices gradually declined the first three months of this year with the April average 3-7¢ below a year ago at Minneapolis and Chicago. Prices at Portland were 5¢ per bushel above a year ago. April 1 stocks totaled 518 million bushels, up 29 million from a year ago, but 7 percent below average. Disappearance, mainly for feed, July through March, totaled 741 million -- 70 million below the same period last year. Exports of around 4 million were only a fifth of those exported the same months last year. Canadian stocks of oats, March 31, totaled 303 million this year as against 281 million last year.

BARLEY ... prices generally declined the first three months of the calendar year. Prices recovered most of the loss in April due in part to good export demand. However, prices in April were below last year in the Midwest but 3-7¢ above on the West Coast. Barley stocks in all positions April 1 totaled 231 million, only 2 million less than a year ago. Disappearance of 322 million bushels, July through March, was only slightly less than last year. Exports of 43 million compared with 50 million a year earlier. Imports were relatively heavy the first 6 months but very light in the past three months. Stocks of Canadian barley, March 31, totaled 200 million -- 60 million above a year ago.

GRAIN SORGHUM ... prices at the farm averaged 5¢ per cwt. higher than a year ago for the first three months of the calendar year. Market prices at Ft. Worth and Los Angeles in April averaged 12-15¢ per cwt. above April 1963. Stocks of 467 million cwt. were 5 million more than a year earlier. Of the total stocks, CCC owned 304 million with an additional 91 million under loan or resale. Exports of 33 million cwt. the first half of the season were about the same as last season. The quantity remaining for feed at 189 million cwt. was slightly above the year before.

SOYBEAN ... prices at Illinois points during the January-March quarter averaged 10¢ per bushel below the same months last year due to smaller crushing and larger supplies. Prices in April were at about last year's level. Stocks of 376 million bushels on April 1 were the largest of record, 34 million above a year ago. Crashings of 223 million the first six months compared with 249 million the same period last season. Exports of 111 million were 5 million more than last year's record. By the end of March farmers had put 67 million bushels under price support as against 53 million a year earlier.

FLAXSEED ... prices averaged \$3.09 per bushel at Minneapolis the first three weeks of April -- about the same as a year ago. Stocks of flaxseed totaled 24.3 million, an increase of 5.5 million over a year earlier. Exports of flaxseed, July through March, at 2.5 million, were down by nearly a million from the year before. Crashings of flaxseed totaled 13.9 million -- down from the 15.6 million crushed in the same period a year ago. Stocks of flaxseed in Canada on March 31 totaled 13.6 million compared with 9.7 million a year earlier.

WINTER WHEAT AND OATS DROP

Winter wheat and oats closed the week ended April 30 at sharply lower prices. Rye and flaxseed went up substantially, but other cash grains generally showed little or no change.

Winter wheat finished 3-4¢ per bushel lower. Demand slowed. Many buyers took a "wait and see" attitude while appraising the transition regulation of the new wheat program, the supply balance, direction of the futures market, effect of the May 23 subsidy cutoff date on exports, and nearness of the new crop. Spring wheat edged up a penny and durum advanced 5¢ at Minneapolis. Offerings were on the light side, but buyers were cautious. White wheat held firm behind good demand in the Pacific Northwest but hard red winter weakened despite fair export bookings. Rye advanced 5¢ in extremely light trading at Minneapolis.

Corn held firm in quiet trading. Continued light offerings and good export demand were supporting factors. Demand was tempered, however, by large stocks in all positions and currently favorable moisture conditions with planting time drawing closer. Oats finished 3-6¢ per bushel lower largely as a result of large stocks and lower futures prices.

Barley stood unchanged to 2¢ lower at the close after a week of relatively slow trading. Firmness in grain sorghum was attributed mainly to light offerings.

Soybeans fluctuated within a narrow range during the week and finished about unchanged. Offerings remained light, and this helped to offset weakness in meal. So did some strength in the oil market. Flaxseed went up 3¢ in quiet trading at Minneapolis.

Special Features

	<u>Page</u>
Food for Peace Authorizations and Agreements	2
Grains - export prices at specified points	2
Feed grains - CCC sales against Certificate Pool	6
Average farm prices, parity and support rates	6
1963-crop wheat - quantity put under loan, by classes, March 31	7
Soybean prices compared with soybean oil and meal prices	8

FURTHER CERTIFICATE PROVISIONS ON OLD-CROP WHEAT...announced this week enable processors to obtain wheat certificates at a reduced cost of 18¢ per bushel on the amount of wheat to which they hold legal title as of May 23, plus any wheat purchases subsequently up to July 1 from CCC for unrestricted use minus the quantities of wheat processed and of wheat sold to others during the period up to July 1.

Food for Peace Authorizations and Agreements, April 24-29, 1964

Country	Date	Number	Commodity	Quantity	Market Value
				Metric tons	1,000 dollars

1/ Hard red spring, hard red winter, and mixed wheat.

Grains: Export prices basis prompt or 30-day shipment, April 30, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/ Grade	Price	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum 2/
			--Dollars--		
Duluth	No. 1 Heavy Northern Spring, 14% protein	2.41	1.27	-	.98
Baltimore	No. 2 Red Winter	2.31	1.44	2.70	1.27
Gulf	No. 1 Hard Winter: Ordinary protein 14% protein	2.41 2.48	1.42 -	2.69 -	2.18 -
Pacific Northwest	No. 2 Western White	2.27	-	-	1.17

1/ The export payment rate for wheat on April 30 was 58¢ per bushel for spring wheat from Duluth, 57¢ for red winter from Baltimore and hard winter from the Gulf, and 45¢ for soft white from the West Coast. Subtracting the export payment rate from the quoted price gives the net price to the foreign buyer.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Apr. 1964	Mar. 1964	Feb. 1964	Apr. 1963
Soybean Oil:					
Average price at crushing plant	Cents per lb.	7.9	8.0	8.0	9.0
Value from bushel of soybeans <u>1</u> / ₄	Dollars	0.87	0.88	0.88	0.96
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	70.05	73.70	74.30	68.40
Value from bushel of soybeans <u>1</u> / ₄	Dollars	1.68	1.77	1.78	1.61
Value of oil and meal from bushel of soybeans <u>1</u> / ₄	Dollars	2.55	2.65	2.66	2.57
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.53	2.63	2.65	2.55
Spread between soybean price and value of oil and meal	Cents	2	2	1	2

1/₄ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

WHEAT MARKET MIXED - OTHER GRAINS LITTLE CHANGED

Wheat prices showed a mixed trend while other cash grain markets registered little or no change for the week ended May 7.

Winter wheat moved down 4-6¢ per bushel in an adjustment toward a new-crop basis in Ft. Worth and Kansas City as Southwest harvesting is about to get under way. Prices advanced 5-7¢ in Chicago and 2¢ elsewhere in the Midwest where offerings of both hard and red winter wheat were light. Mills reportedly bought to replace their grind but were cautious about building up stocks while awaiting more details on transition operations of the 1964 wheat program. Spring wheat edged up a penny on ordinary and 13 percent protein types but lost 3¢ on 15 percent or higher proteins at Minneapolis. Durum was steady to higher. Demand was good for both classes, but delivery date was an important factor. So were particulars of the new wheat program. White wheat held steady in the Pacific Northwest while winter wheat broke 2-16¢ depending on shipping date and ownership. Mills placed strong values on shipments arriving before May 23 while export wheat had a lower price tag. Rye declined a penny in light trading at Minneapolis.

Corn finished steady to 2¢ per bushel higher as light offerings continued to find good processor and export demand. Oats held firm, supported by skimpy offerings. Barley was steady in the Midwest but weaker on the West Coast. Firmness in grain sorghum reflected light offerings and good demand for use in starter feeds.

Soybeans closed on a weak note as easiness in meal and the unfavorable crushing rate more than offset support offered by light marketings and favorable export inspections. Flaxseed held steady in very limited trading at Minneapolis.

A SERIES OF FOUR MEETINGS WITH WHEAT PROCESSORS ... to explain operations under the 1964 wheat program, including the transition from old to 1964-crop wheat, have been announced by USDA. Meetings are scheduled for: May 14 at 1:30 P.M. in the Curtis Hotel at Minneapolis, Minn.; May 18 at 9:30 A.M. in the Bellevue Hotel at San Francisco, Calif.; May 19 at 1:30 P.M. in the Muehlebach Hotel at Kansas City, Mo.; and May 21 at 9:00 A.M. in the Hotel Roanoke at Roanoke, Va. All persons engaged in the processing of wheat into food or non-food products are invited to attend the meetings.

WHEAT FUTURES TRADED UNDER REVISED U.S. WHEAT STANDARDS ... are bringing higher prices than the same grade under standards currently in effect. The revision in grade standards, to become effective June 1, 1964, has brought a price premium of about 1¢ per bushel for wheat deliverable on futures contracts at three important grain trading centers--the Chicago Board of Trade, the Kansas City Board of Trade, and the Minneapolis Grain Exchange. The revisions in wheat standards reduce the amounts of nonmillable materials permitted in wheat of the various grades. This gives assurance that wheat will not contain the larger amounts of these materials that are permitted under standards currently in effect.

CONTEMPLATED CCC SALE OF ABOUT 3 MILLION BUSHEL OF FLAXSEED ... and the concurrent purchase of a resultant quantity of linseed oil was announced this week. Flaxseed will be sold by CCC at announced prices and locations, in store or f.o.b. processors' conveyances. Acceptance will be on the basis of prices at which bidders will sell the linseed oil to CCC. Linseed oil delivered to CCC need not be identical oil obtained from crushing of flaxseed delivered by CCC, but it must be oil meeting Federal specifications and be produced from 1963-crop flaxseed. Quantity of oil to be delivered to CCC must be equal to 20 pounds of oil per net bushel of flaxseed delivered to the crusher. Meal obtained from crushing will remain as property of the crusher.

Grains: Export prices basis prompt or 30-day shipment, May 7, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn		Soybeans		Barley	
	Grade	Price	No. 2 Yellow	No. 2 Yellow	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/	
--Dollars--								
Duluth	No. 1 Heavy Northern Spring, 14% protein.	2.40	1.28	-	-	-	0.98	
Baltimore	No. 2 Red Winter	2.33	1.45	2.69	-	-	1.27	
Gulf	No. 1 Hard Winter: Ordinary protein .. 14% protein	2.38 2.45	1.43 -	2.68 -	-	-	2.18 -	
Pacific Northwest	No. 2 Western White ...	2.27	-	-	-	-	1.16	

1/ The export payment rate for wheat on May 7 was 59¢ per bushel for spring wheat from Duluth, 54¢ for red winter from Baltimore and hard winter from the Gulf, and 45¢ for soft white from the West Coast. Subtracting the export payment rate from the quoted price gives the net price to the foreign buyer.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

The above rates on wheat and wheat flour shall serve as the export allowances to be used in establishing prices for CCC wheat for export under Announcements GR-261 and GR-262 as provided therein. 1/ For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply. 2/ Excluding Durum Wheat. 3/ A zero rate is applicable to sales for shipment from California ports during the period June 1 thru June 30, 1964. 4/ Flour which is processed on or after July 1, 1964, from wheat to which domestic marketing certificates apply, and which is exported, will be eligible for the export payment rate applicable to the period beginning July 21, 1964. This rate takes account of flour milled from wheat to which domestic marketing certificates apply. When payment is claimed at this rate for any flour exported, exporters will be required to obtain a certification from the miller that domestic marketing certificates have been or will be purchased in accordance with the "Processor Wheat Marketing Certificate Regulations" on all wheat from which such flour was milled. If flour exported was not milled from wheat to which domestic marketing certificates apply, the applicable rate shall be the rate announced for the period ending July 20. Flour which was milled in part from certificated wheat and in part from non-certificated wheat and which is exported pursuant to a single registered sale shall be eligible for a rate determined on a pro rata basis. In such event, the exporter must obtain from the miller the certification specified above with respect to the wheat to which domestic marketing certificates apply.

WHEAT MARKETS ERRATIC - OTHER GRAINS UNCHANGED TO LOWER

Wheat markets fluctuated wildly during the week ended May 14 with hard wheat closing higher but other wheats sharply lower. Soybeans and rye went down while other grains were unchanged to lower.

Hard winter wheat went up 2-6¢ per bushel reflecting substantial sales for export, good demand from mills and meager offerings. Rains were reported as delaying maturity of wheat in North Texas and South Oklahoma which would put off marketing of the early crop. Red winter wheat prices dropped 18¢ per bushel in two days with a 10¢ recovery on Wednesday. Prices closed 8-10¢ below a week ago with the market extremely nervous. Spring wheat lost 7¢ at Minneapolis with the market featured by wide price fluctuations. Despite the report that flour mills were grinding at near capacity level, demand for wheat was slow. Durum dropped 18¢ reflecting the unsettled market and slowness in semolina buying. White wheat held steady in the Pacific Northwest with export sales small. Rye fell 6¢ at Minneapolis with a limited demand and good prospects for the new crop.

Corn prices were unchanged to 2¢ per bushel lower with some increase in farm selling, good crop prospects and a somewhat slower export interest. Oats advanced 3-4¢ at Minneapolis but were unchanged to 1¢ higher at Chicago. Barley remained firm at Minneapolis but weakened slightly at Portland. Grain sorghums were unchanged to 2¢ per cwt. lower with demand slow.

Soybeans dropped 4¢ per bushel reflecting continued unfavorable crushing rates. Exports while larger than last year have not been able to offset the smaller domestic needs. Flaxseed declined 5¢ at Minneapolis.

Wheat - supply and distribution, monthly	16

WINTER WHEAT PROSPECTS ... on May 1 were about the same as a month earlier with the 1964 crop estimated at 1,013 million bushels. This would be 12 percent above the 1963 crop of 905 million but slightly below the 1958-62 average. Improved prospects in most of the eastern two-thirds of the Nation offset declines in many western States and the Texas and Oklahoma panhandle areas, southwest Kansas and southeast Colorado, where dry weather continued to prevail through April.

PROCESSOR REGISTRATION DETAILS ... under the Wheat Certificate Program were announced. All processors of wheat will register with the Department by May 20. Data submitted on the registration form will include the type of processing operations, food and non-food products manufactured, average monthly production, pounds of wheat per pound of product and other information needed for operation of the domestic wheat certificate program.

1964 WHEAT PROGRAM SIGNUP TIME ... was extended for one week from May 15 to May 22. The late, wet, cold spring in certain areas which forced extensive field work during the signup period, and the heavy county ASC workload caused a number of delays.

EXPORTS OF WHEAT AND FLOUR ... during April totaled around 84 million bushels on the basis of inspection records. While this is slightly less than the 92 million exported in March it is well above a year ago. Exports for the ten months, July-April, now total around 707 million -- around 200 million more than in the same months last year. Supplies of wheat on May 1 for milling, export or carryover totaled 1.1 billion bushels -- a drop of 300 million from the same date a year ago.

1964-CROP WHEAT COUNTY AND TERMINAL ... price support rates were announced as follows with 1963 rates in parentheses: Kansas City-Omaha \$1.53 (\$2.07); California \$1.55 (\$2.08); East Coast \$1.69 (\$2.22); Pacific \$1.47 (\$2.00); Minneapolis-Duluth \$1.63 (\$2.16); Gulf Ports \$1.77 (\$2.27); Chicago-St. Louis \$1.57 (\$2.10); Memphis \$1.56 (\$2.09).

Grains: Export prices basis prompt or 30-day shipment, May 14, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/ Grade	: Corn :Soybeans: Barley

Gulf	No. 1 Hard Winter:				
	Ordinary protein ...	2.36	1.39	2.63	2.18
	14% protein	2.43	-	-	-
Pacific Northwest	No. 2 Western White ...	2.27	-	-	1.15

1/ The export payment rate for wheat on May 14 was 51¢ per bushel for spring wheat from Duluth, 47¢ for red winter from Baltimore and hard winter from the Gulf, and 45 ¢ for soft white from the West Coast. Subtracting the export payment rate from the quoted price gives the net price to the foreign buyer.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

WHEAT MARKET IRREGULAR - OTHER GRAINS LITTLE CHANGED

Most wheat prices turned unevenly and sharply lower in adjusting toward a new-crop basis during the week ended May 21. Spring wheat advanced, however. Other cash grains generally showed little or no change.

Winter wheat closed from 1¢ per bushel lower at Kansas City to as much as 37¢ lower at Ft. Worth. Cash trading was erratic and quite sensitive to action and influences on the futures market, making it very hard at times to peg the exact level of spot prices. Harvesting gained momentum in Texas. Crop progress was good elsewhere, but some areas need rain. Spot supplies were tight, but domestic buyers were awaiting heavier new-crop movement and export demand was slack. Spring wheat advanced 5¢ and durum went up 2¢ at Minneapolis with light offerings finding ready outlets. White wheat held steady in quiet trading in the Pacific Northwest. Rye was not much changed in Minneapolis as slow flour business provided little buying incentive despite light receipts.

Corn prices generally closed not more than a cent per bushel higher or lower. Offerings were light. While still good, demand was more selective. Oats went up 1-2¢ in Chicago but lost 2¢ in Minneapolis with demand good. Barley held firm in quiet trading. Grain sorghum showed little change with trading limited.

Soybeans closed on a mixed note--finishing 1¢ per bushel lower at Chicago but 4¢ higher at Minneapolis. The market drew late support from larger than expected April crushings of 35.3 million bushels, only a little less than a year earlier. Weakness in meal discouraged buying and offset improvement in oil. Flaxseed held steady at Minneapolis.

Special Features

	<u>Page</u>
Grains - export prices at specified points.....	2

Corn - quantity put under price support and outstanding by States	12
Wheat, rye, oats, barley, grain sorghum, soybeans and flaxseed - quantity repaid, delivered, and outstanding under price support by States	13-19
Grains - quantity under price support	20

QUANTITY OF 1963-CROP CORN PUT UNDER PRICE SUPPORT ... loans and purchase agreements through April 1964 totaled 382.5 million bushels. This compares with nearly 532 million bushels of 1962-crop corn put under support through April 1963 and is the smallest amount put under support through April since 1959. Of the 382.5 million bushels of corn put under support, 364.5 million bushels were farm-stored, 15.7 million were warehouse-stored, and 2.3 million bushels were under purchase agreements. Through April, farmers had repaid loans on 11.3 million bushels of 1963-crop soybeans. Most of the repayments were in the following States: Iowa 4.6 million bushels, Illinois 2.0 million bushels, Minnesota 1.5 million bushels, Arkansas 778,000 bushels, Missouri 753,000 bushels, and Indiana 330,000 bushels.

SIGNUP REPORT ON 1964 WHEAT PROGRAM ... shows that through May 15 farms having 70 percent of the effective national wheat acreage allotment have been signed up to participate in the 1964 voluntary wheat program. The 525,959 farms signed have effective allotments totaling 37,250,465 acres. Total diversion on signed farms is 4,842,524 acres of which 4,140,698 acres reflect the 10 percent reduction in 1964 allotments from the former 55-million-acre level and the remaining 702,097 acres are additional diversions from the 1964 allotments.

REGISTRATION DEADLINE FOR PROCESSORS OF WHEAT ... under the new processor wheat marketing certificate regulations has been extended to May 30, 1964. Extension of the registration deadline was made to give processors more time to complete and file their forms. All processors of wheat, whether for food or animal feed uses, with the exception of those who process wheat exclusively for use on the farm where grown, are required to register under this program.

Grains: Export prices basis prompt or 30-day shipment, May 21, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
--Dollars--					
Duluth	No. 1 Heavy Northern Spring, 14% protein.	2.36	1.30	-	0.98
Baltimore	No. 2 Red Winter	-	1.44	2.65	1.27
Gulf	No. 1 Hard Winter:				
	Ordinary protein ...	2.00	1.43	2.64	2.19
	14% protein	2.10	-	-	-
Pacific Northwest	No. 2 Western White ...	2.27	-	-	1.15

1/ The export payment rate for wheat on May 21, was 53¢ per bushel for spring wheat from Duluth, 0¢ for red winter from Baltimore and hard winter from the Gulf, and 45¢ for soft white from the West Coast. Subtracting the export payment rate from the quoted price gives the net price to the foreign buyer.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for com, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Total Supplies	2,333	2,416	2,646
Domestic requirements for season 1/	595	584	605
Supplies available for export or carryover	1,738	1,832	2,041
Exports, July 1 through April 30 2/	707	501	595
Supplies on May 1 for export or carryover	1,031	1,331	1,446
CANADA			
Carryover stocks, August 1	487	391	608
Production	723	566	283
Total Supplies	1,210	957	891
Domestic requirements for season 1/	155	138	142
Supplies available for export or carryover	1,055	819	749
Exports, August 1 through April 30 2/	390	244	273
Supplies on May 1 for export or carryover	665	575	476
ARGENTINA			
Carryover stocks, December 1 of preceding year ...:	10	10	35
Production	260	190	190
Total Supplies	270	200	225
Domestic requirements for season 1/	127	124	116
Supplies available for export or carryover	143	76	109
Exports, December 1 through April 30 2/	67	38	61
Supplies on May 1 for export or carryover	76	38	48
AUSTRALIA			
Carryover stocks, December 1 of preceding year ...:	28	22	28
Production	334	307	247
Total Supplies	362	329	275
Domestic requirements for season 1/	76	72	75
Supplies available for export or carryover	286	257	200
Exports, December 1 through April 30 2/	131	77	84
Supplies on May 1 for export or carryover	155	180	116
TOTAL FOR THE FOUR COUNTRIES			
Carryover stocks, beginning of season	1,720	1,745	2,082
Production	2,455	2,157	1,955
Total Supplies	4,175	3,902	4,037
Domestic requirements for season 1/	953	918	938
Supplies available for export or carryover	3,222	2,984	3,099
Exports, season through April 30 2/	1,295	860	1,013
Supplies on May 1 for export or carryover	1,927	2,124	2,086

1/ Estimated requirements for seed, food (milling for domestic use), and feed for the season. 2/ Exports of wheat and flour in grain equivalent.

MOST WHEAT DROPS - OTHER GRAINS WEAKEN

Most wheat prices broke sharply in a continued downward adjustment toward a new-crop basis during the holiday-shortened week ended May 27. Spring wheat held steady, however, and other cash grain markets softened.

Winter wheat finished 17-29¢ per bushel lower. Prices were mostly nominal, however, as traders found it difficult to determine the exact level of the market. New crop harvestings spread rapidly in the Southwest. Buyers generally stuck to the sidelines while awaiting more general harvesting and the beginning of the wheat certificate program. Spring wheat held steady on extremely light supplies at Minneapolis, but durum prices dropped 35¢ with a lack of mill demand. White wheat prices fell 23-28¢ per bushel and hard winter was down 47-50¢ in the Pacific Northwest. Trading was almost at a standstill as buyers await the new crop and the new price support program. Rye weakened in spite of light receipts at Minneapolis.

Corn closed unchanged to mostly 1 or 2¢ per bushel lower. Light offerings continued to find good demand. Oats prices softened and light offerings found ready outlets. Barley held firm in Minneapolis but weakened behind slow demand elsewhere. Grain sorghum edged up 1-4¢ per cwt. with improved demand for light offerings at Kansas City. Prices held steady with light interest at Fort Worth.

Soybeans declined 1-2¢ per bushel. The downturn was eased to some extent by good demand for light offerings, the more favorable crushings report, and improvement in the meal market. Flaxseed held steady on lighter receipts at Minneapolis.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
1964 Wheat Program - final signup report through May 22, 1964	6
Soybean prices compared with soybean oil and meal prices	7
Soybeans and flaxseed - supply and distribution, monthly	7
Feed grains - CCC sales against Certificate Pool	8

SIGNUP REPORT ON 1964 WHEAT PROGRAM ... shows that through May 22 farms having 76 percent of the effective national wheat acreage allotment have been signed up to participate in the 1964 voluntary wheat program. The 611,728 farms signed have effective allotments totaling 40,682,419 acres. Total diversion on signed farms is 5,349,376 acres of which 4,506,870 acres reflect the 10 percent reduction in 1964 allotments from the former 55-million-acre level and the remaining 842,506 acres are additional diversions from the 1964 allotments. (Details p.6).

WHEAT AND FEED GRAINS SUBSTITUTION ... would be authorized in the 1965 programs so that summer fallow operations for next year's crop may take place promptly. Reason for the substitution between wheat and feed grains for 1965 is to permit greater flexibility in farm operations. Substitution will apply on individual farms only if the farm has both a feed grain base and a wheat allotment. Producers will need to meet at least the minimum diversion for both wheat and feed grains in order to utilize the substitution provisions.

SOYBEAN SUPPLIES ... on May 1 for processing, export or carryover totaled 288 million bushels. This was 24 million more than a year earlier and 16 million more than two years ago. Exports of soybeans, October-April, totaled 127 million, an increase of 7 million over the same months last season and 23 million more than the same months two years ago. Crushings of 259 million were 26 million less than a year ago for the first 7 months of the season.

SOYBEAN MARGINS ... continue at a low level on the basis of market prices for soybeans and returns for oil and meal. The margin between the value of oil and meal from a bushel of soybeans, on the basis of crushing returns, and the price of No. 1 soybeans has been 1-2¢ per bushel for four months. Somewhat higher prices for soybean oil in May was more than offset by lower prices for soybean meal. The margin for February-May last year ranged from 2-6¢ per bushel. (Details p. 7).

Grains: Export prices basis prompt or 30-day shipment, May 27, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
--Dollars--					
Duluth	No. 1 Heavy Northern				
	Spring, 14% protein.	2.38	1.29	-	0.98
Baltimore	No. 2 Red Winter	1.81	1.43	2.63	1.28
Gulf	No. 1 Hard Winter:				
	Ordinary protein ...	1.83	1.42	2.62	2.15
	14% protein	1.90	-	-	-
Pacific Northwest	No. 2 Western White ..	-	-	-	1.15

1/ The export payment rate for wheat on May 27 was 55¢ per bushel for spring wheat from Duluth, 0¢ for red winter from Baltimore and hard winter from the Gulf, and 45¢ for soft white from the West Coast. Subtracting the export payment rate from the quoted price gives the net price to the foreign buyer.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	May ^{2/} 1964	Apr. 1964	Mar. 1964	May 1963
Soybean Oil:					
Average price at crushing plant	Cents per lb.	8.4	7.9	8.0	9.2
Value from bushel of soybeans <u>1/</u>	Dollars	0.92	0.87	0.88	0.98
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	65.10	70.05	73.70	68.10
Value from bushel of soybeans <u>1/</u>	Dollars	1.56	1.68	1.77	1.60
Value of oil and meal from bushel of soybeans <u>1/</u>	Dollars	2.48	2.55	2.65	2.58
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.47	2.53	2.63	2.56
Spread between soybean price and value of oil and meal	Cents	1	2	2	2

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64. 2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Soybeans and Flaxseed: Supply and distribution

Item	Soybeans		Flaxseed	
	Year beginning Oct. 1		Year beginning July 1	
	1963-64	1962-63	1963-64	1962-63
	--1,000 bushels--			
Carryover	15,055	57,565	8,388	3,608
Production	701,465	669,211	31,481	32,230
Total supply	716,520	726,776	39,869	35,838
Adjusted total supply <u>1/</u>	716,520	716,276		
Disappearance through April 30:				
Seed, feed and residual for season:	42,000	46,400	900	2,110
Crushed for oil or processed	258,787	284,993	15,504	17,286
Exported	<u>2/</u> 127,246	119,988	<u>2/</u> 2,633	3,521
Total disappearance	428,033	451,381	19,037	22,917
Balance on May 1 for processing, export or carryover	288,487	264,895	20,832	12,921

1/ The soybean supply has been adjusted by subtracting crushings and exports of new-crop soybeans in September and adding an estimate for crushings and exports of new-crop beans the following September. Estimated new-crop crushings and exports were as follows, in million bushels: September 1962 - 17.0; September 1963 - 6.5; and September 1964 - 6.5. No allowance is made for new-crop flaxseed crushed prior to July 1.

2/ Partly estimated.

June 5, 1964

WHEAT UNSETTLED - OTHER GRAINS FIRM

Wheat markets remained unsettled in the transition to a new-crop basis and prices fluctuated within a very wide range during the week ended June 4. Most other grains ruled firm except for a little softness in oats and barley.

Firmness in hard winter wheat generally reflected light new-crop offerings. Harvesting in early areas was interrupted by rain. Demand was good, but most buyers appeared content to await full scale movement. Both yellow hard and red winter wheats dropped 6-24¢ per bushel on a nominal basis in Chicago. Spring wheat advanced 6-7¢ with good demand for light receipts at Minneapolis, but durum held steady with light interest and offerings. White wheat lost 40¢ per bushel in the new-crop transition but hard winter went up 2¢ in the Pacific Northwest. Trading was seasonally quiet, influenced by limited supplies and dull demand for the nearby position. Rye advanced 5¢ at Minneapolis, reflecting strength in wheat.

Corn ruled firm as light country offerings continued to find good demand. Oats markets softened in rather limited trading. Barley held steady on the West Coast but weakened behind slower demand in the Midwest. Grain sorghum advanced 2-5¢ at Kansas City, bolstered by sales to poultry feed manufacturers. However, prices held steady at Ft. Worth where offerings were limited.

Soybeans went up 1-2¢ per bushel, reflecting small country marketings, favorable export inspection figures, and reports of inadequate moisture in some of the late planted areas. Flaxseed held steady in quiet trading at Minneapolis.

TERMINAL AND COUNTY PRICE SUPPORT LOAN RATES FOR 1964-CROP GRAIN SORGHUM ... were announced this week. National average support price is \$2.00 per cwt. for 1964-crop grain sorghum grading No. 2 or better. While the total support is unchanged from the 1963-crop level, the 1964-crop support reflects an average loan rate of \$1.77 per cwt. with a payment-in-kind of 23¢, compared to 1963-crop rates of \$1.71 for loans and 29¢ for payment-in-kind.

Food for Peace Authorizations and Agreement, May 22-June 4, 1964

Country	Date	Number	Commodity	Quantity	Market Value
				Metric tons	1,000 dollars
<u>AUTHORIZATIONS</u>					
Yugoslavia	May 26	11-410	Wheat <u>1/</u>	100,000	7,266
Cyprus	June 1	62-03	Wheat <u>2/</u>	8,500	583
				Thousand bushels	
<u>AGREEMENT</u>					
Republic of China ...	June 3	-	Corn	591	827

1/ Soft red winter, mixed wheat, hard red spring, and hard red winter.

2/ Hard red spring, hard red winter, and mixed wheat.

Grains: Export prices basis prompt or 30-day shipment, June 4, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u> Grade	Price	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum <u>2/</u>
--Dollars--					
Duluth	No. 1 Heavy Northern Spring, 14% protein.	2.44	1.29	-	0.98
Baltimore	No. 2 Red Winter	1.81	1.45	2.65	1.28
Gulf	No. 1 Hard Winter: Ordinary protein ... 14% protein	1.83 1.90	1.44 -	2.64 -	2.15 -
Pacific Northwest	No. 2 Western White ...	2.27	-	-	1.15

1/ The export payment rate for wheat on June 4, was 61¢ per bushel for spring wheat from Duluth, 0¢ for red winter from Baltimore and hard winter from the Gulf, and 45¢ for soft white from the West Coast. Subtracting the export payment rate from the quoted price gives the net price to the foreign buyer.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

WHEAT PRICES DROP

Prices of wheat suffered another round of sharp setbacks in a further adjustment to a new-crop basis during the week ended June 11. Most other cash grains showed a weaker tendency.

Winter wheat prices plunged downward 29¢ per bushel at Kansas City, 19¢ at Chicago, and 7¢ at Ft. Worth. With the return of favorable weather, harvesting resumed over wide areas of the hard wheat belt. Offerings increased as farmers sold freely. Receipts were readily absorbed, however, as mills bought actively ahead of the July 1 certificate program. Harvesting of red wheat got underway in Southeast Missouri and a few shipments began trickling into Missouri terminals. The new-crop adjustment at Minneapolis dropped spring wheat prices 14-22¢ and durum 3-5¢. Demand was quiet. White wheat held firm in slow trading in the Pacific Northwest. Rye weakened slightly despite tightly held supplies and concern over dry weather in the Dakotas.

Corn finished unchanged to 2¢ per bushel lower. Offerings were not large, but demand was tempered by competition from feedstuffs and favorable crop news. Oats were not much changed in dull trading. Barley buyers became more selective and prices weakened. Grain sorghum went up 4¢ per cwt. behind active demand from feed manufacturers at Kansas City, but held steady at Ft. Worth. New-crop harvest was underway in the Texas lower Rio Grande Valley.

Soybeans declined 1-2¢, influenced mainly by favorable weather and crop news. Flaxseed held steady in Minneapolis.

Wheat - supply and distribution, monthly	16

1964 WHEAT CROP ... was estimated at 1,213 million bushels on the basis of conditions on June 1 by the Crop Reporting Board. If realized this would be 7 percent more than the 1963 crop of 1,138 million but 3 percent less than the 1958-62 average. The winter wheat crop was indicated at 981 million, 3 percent less than the May 1 forecast but 8 percent more than last year. The all spring wheat crop was forecast at 232 million of which the durum crop was 46.5 million. The 1963 crop was 233 million with nearly 50 million of it durum.

EXPORTS OF WHEAT AND FLOUR ... during May totaled around 77 million bushels on the basis of wheat inspection for export and flour registrations. This compares with 83 million exported in April and 77 million in May 1963. On the basis of this, exports July through May, total around 780 million or about 200 million more than the same months last year. Inspections for export of wheat, grain only, totaled 68 million. Of this, 46 million was hard winter, 12 million white and 3 million each of spring, red winter and durum. Inspections, July through May, totaled 698 million of which 436 million were hard winter, 122 million white, 69 million red winter, 41 million spring and 27 million durum. Of the total wheat exported thus far, 302 million were commercial or sales for dollars and 321 million exported under Title I of Public Law 480. Of the exports under Title I, 258 million were hard winter and 57 million white wheat. Of the sales for dollars, 119 million were hard winter, 63 million each of red winter and white, and 27 million each of spring and durum. Nearly 76 million bushels were exported the first 11 months under various programs of which 35 million were donations, mostly under Titles II and III of PL. 480, 23 million under the Barter program and about 12 million for long-term credit under Title IV, of PL. 480.

Grains: Export prices basis prompt or 30-day shipment, June 11, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/	Corn	Soybeans	Barley	
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/
			--Dollars--		
Duluth	No. 1 Heavy Northern Spring, 14% protein.	2.30	1.28	-	0.99
Baltimore	No. 2 Red Winter	1.74	1.43	2.65	1.27
Gulf	No. 1 Hard Winter:				
	Ordinary protein ...	1.78	1.42	2.64	2.15
	14% protein	1.85	-	-	-
Pacific Northwest	No. 2 Western White ..	2.27	-	-	1.15

^{1/} The export payment rate for wheat on June 11, was 47¢ per bushel for spring wheat from Duluth, 0¢ for red winter from Baltimore and hard winter from the Gulf, and 45¢ for soft white from the West Coast. Subtracting the export payment rate from the quoted price gives the net price to the foreign buyer.

^{2/} No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

The above rates on wheat and wheat flour shall serve as the export allowances to be used in establishing prices for CCC wheat for export under Announcements GR-261 and GR 262 as provided therein. 1/ For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply. 2/ Excluding Durum Wheat. 3/ A zero rate is applicable to sales for shipment from California ports during the period June 1 thru June 30, 1964. 4/ Flour which is processed on or after July 1, 1964, from wheat to which domestic marketing certificates apply, and which is exported, will be eligible for the export payment rate applicable to the period beginning July 21, 1964. This rate takes account of flour milled from wheat to which domestic marketing certificates apply. When payment is claimed at this rate for any flour exported, exporters will be required to obtain a certification from the miller that domestic marketing certificates have been or will be purchased in accordance with the "Processor Wheat Marketing Certificate Regulations" on all wheat from which such flour was milled. If flour exported was not milled from wheat to which domestic marketing certificates apply, the applicable rate shall be the rate announced for the period ending July 20. Flour which was milled in part from certificated wheat and in part from non-certificated wheat and which is exported pursuant to a single registered sale shall be eligible for a rate determined on a pro rata basis. In such event, the exporter must obtain from the miller the certification specified above with respect to the wheat to which domestic marketing certificates apply.

WHEAT PRICES CONTINUE DOWNWARD ADJUSTMENT

Most wheat prices continued their downward retreat toward a new-crop basis. Other cash grains showed a weaker trend during the week ended June 18.

Winter wheat declined 2-4¢ per bushel at Ft. Worth and 13-16¢ at other major terminals. However, prices showed independent strength at Chicago where hard winter wheat advanced 16-17¢ and red winter was nominally 6-7¢ higher. Harvesting continued to expand in the Southwest, but wet weather delays held receipts closely in line with demand. Mills took a good volume of new-crop wheat but no more than could be ground before July 1. Spring wheat prices dropped 22-26¢ in extremely light trading at Minneapolis, but durum strengthened on the few cars traded. White wheat prices softened and hard wheat lost 8¢ in the Pacific Northwest where trading was narrow. Rye declined 2¢ at Minneapolis. Rye flour sales were light, and buyers were not pressed for supplies.

Corn fluctuated within a narrow range and closed no more than 1 or 2¢ per bushel higher or lower. Demand continued good on relatively light offerings. Oats weakened behind slower demand. Barley sold steady to as much as 8¢ lower as demand narrowed and prices turned toward a new-crop basis in some areas. Grain sorghum was little changed on light offerings. However, new-crop harvesting in South Texas caused a weaker undertone.

Soybeans finished unchanged or 1¢ per bushel lower in rather featureless trading during the week. Offerings were limited but ample for current demand. Flaxseed lost 5¢ as buyers lowered bids at Minneapolis.

OPERATING PROCEDURES ON WHEAT EXPORT MARKETING CERTIFICATES ... for that phase of the 1964 wheat program were announced this week. Beginning July 1, exporters of wheat are to acquire and surrender to USDA export marketing certificates equivalent to the number of bushels of wheat exported. Export certificates cost 25¢ per bushel. Exporters may surrender marketing certificates either prior to export of wheat or within 15 days after export on an interest-free basis or within 45 days with interest payable for the entire period at 6 percent. In the latter instance, an exporter filing an intention to export, in effect, enters into an agreement with USDA to buy export marketing certificates to cover the export within 45 days after shipment. Export certificates may be acquired from and surrendered to the Kansas City ASCS Commodity Office. Flour exports are not affected by export certificates since wheat used in flour is subject to domestic marketing certificates. USDA will continue to make export payments, when needed, to price U. S.-produced wheat competitively with world market prices and to fulfill international obligations. The export payments will take into consideration the domestic price of wheat plus the cost of export certificates. Export payments will continue to be announced daily.

CCC WEST COAST HARD WINTER WHEAT STOCKS RESERVED FOR DOLLAR EXPORT SALES ... This action was taken because CCC stocks of this class of wheat for export off the West Coast are not adequate to meet both the heavy dollar demand for hard winter wheat and possible movement under government programs. USDA will continue to redeem payment-in-kind certificates earned under the wheat export program with hard winter wheat on the West Coast, but the export disposition of this wheat will be limited to sales for dollars and will not be accepted under Title I, Public Law 480 sales. Export sales of CCC-owned hard winter wheat for shipment through other U. S. port locations are not affected by this week's action.

PRICE-SUPPORT RESEAL PROGRAM ON 1963-CROP SOYBEANS ... was announced this week. Under the program, farmers can obtain extension of current price support loans on farm-stored soybeans and earn storage payments. Loans extended on farm-stored soybeans under the reseal program will mature July 31, 1965.

PRICE-SUPPORT ACTIVITIES THROUGH MAY ... showed that farmers had put 387.7 million bushels of 1963-crop corn under price support loans and purchase agreements. This is at the lowest level in five years, and compares with 572.8 million bushels of 1962-crop corn put under support through May last year. Loan redemptions totaled around 46 million bushels, so that total takeover this year will not be more than 341 million bushels. The maximum possible price-support takeover of 1963-crop wheat--87.8 million bushels--will be the least since the 1950 crop of wheat. Through May, farmers had repaid loans on nearly 17.6 million bushels of 1963-crop soybeans put under support--6.9 million in Iowa, 2.8 million in Illinois, 2.5 million in Minnesota, 1.8 million in Arkansas, 1.3 million in Missouri, and 512,000 bushels in Indiana. (See price support details by States on pages 8-16.)

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

June 14, 1963	2,270	-	1,976	-	206,736	275	519,594	-

1/ Based on marketing year July 1 for barley, grain sorghum and wheat; October 1 for corn.

In some weeks adjustments have been made, so the reported weekly sales do not necessarily add to cumulative sales.

Net value of 1962 and 1963 Feed Certificate Pool remaining for liquidation on June 12, 1964 totaled \$805,774,598. Net value of Wheat Certificate Pool totaled \$55,334,238.

Food for Peace Authorizations and Agreements, June 12-18, 1964

Country	Date	Number	Commodity	Quantity	Market Value
<u>AUTHORIZATIONS</u>				Metric tons	1,000 dollars
Yugoslavia	June 12	11-411	Wheat <u>1/</u>	160,000	10,252
Portugal	" 12	35-406	Wheat <u>1/</u>	75,000	4,685
Pakistan	" 15	15-148	Wheat <u>1/</u>	100,000	6,522
<u>AGREEMENTS</u>				Thousand bushels	
Korea	June 15	-	Wheat	6,400	13,800
Guinea	" 15	-	Wheat flour	2,300	3,760

1/ Hard red spring, hard red winter, and mixed wheat.

Grains: Export prices basis prompt or 30-day shipment, June 18, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>	Corn	Soybeans	Barley	
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
			--Dollars--		
Duluth	No. 1 Heavy Northern				
	Spring, 14% protein.	2.05	1.28	-	0.99
Baltimore	No. 2 Red Winter	1.73	1.44	2.65	1.27
Gulf	No. 1 Hard Winter:				
	Ordinary protein ...	1.75	1.43	2.64	2.15
	14% protein	1.82	-	-	-
Pacific Northwest	No. 2 Western White ..	2.11	-	-	1.14

1/ The export payment rate for wheat on June 18, was 20¢ per bushel for spring wheat from Duluth, 0¢ for red winter from Baltimore and hard winter from the Gulf, and 30¢ for soft white from the West Coast. Subtracting the export payment rate from the quoted price gives the net price to the foreign buyer.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Washington, D. C. 20250

June 26, 1964

WHEAT PRICES GENERALLY LOWER -- OTHER GRAINS LITTLE CHANGED

Most cash wheat markets weakened with prices sharply lower at Chicago and Minneapolis as the week ended June 25. Markets for other cash grains were steady to slightly weaker.

Hard winter wheat dropped 18¢ per bushel at Chicago and 3-6¢ at most other markets. Red winter wheat was 8-9¢ lower at Chicago, 6¢ lower at Toledo, but 1-3¢ higher at St. Louis. Recent rains raised the moisture content of a large percentage of the hard winter wheat arriving at the terminals and many cars were grading tough. Export demand was active. The wheat grind increased and mills were purchasing for last minute grind, but this demand tapered off at the end of the week due to the proximity of the July 1 certificate deadline. There was little interest in contracts for shipment after July 1. Farmers generally were offering wheat freely as prices were still moderately above the loan. Spring wheat prices dropped 20¢ per bushel at Minneapolis, but very little wheat moved at these levels. Offerings were light, and demand was inactive. Durum wheat remained unchanged from a week earlier. Pacific Northwest markets were seasonally quiet. Transition from old to new-crop basis was generally in effect. Both offerings and demand were limited with prices the same as a week earlier. Rye declined 1¢ at Minneapolis.

Corn markets were generally unchanged from a week ago. Widespread rains were a weakening factor, but this was offset by a fair export demand and improved demand from feed manufacturers who were filling orders for hog and poultry rations. Cash oats were firm to slightly higher despite a six-year low in the Chicago futures market. Barley markets were firm to slightly higher reflecting fair demand for decreased receipts. Grain sorghum advanced 2¢ per cwt. at Ft. Worth despite an inactive demand.

Soybeans were generally unchanged. Reports of poor and uneven stands were strengthening factors, but this was offset by the larger acreage this year. Flaxseed dropped 5¢ reflecting an inactive demand.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Wheat - inspected receipts by classes at selected markets, May	6-7
Grains - inspected receipts at selected markets, May	8-9
Soybean prices compared with soybean oil and meal prices	10
Soybeans and flaxseed - supply and distribution, monthly	10
Feed grains - CCC sales against Certificate Pool	11
Food for Peace Authorizations	11

NATIONAL ACREAGE ALLOTMENT PROCLAIMED FOR 1965-CROP WHEAT ... totaled 49.5 million acres--the same as the 1964 allotment. Included in the national allotment for 1965-crop wheat is a national reserve of 20,000 acres for additional allotments to be issued on the basis of relative need due to new areas coming into production of wheat during the last 10 years. It has been the same amount for several years. A special acreage reserve of 100,000 acres is being established for the first time as provided by the Agricultural Act of 1964. This special reserve is for additional allotments to eligible farms in counties where wheat is a major income producing crop. It will be used in adjusting allotments for eligible old wheat farms.

CANADIAN SEEDING PROGRESS ... through May 31 was slightly higher than last year and ahead of the average according to the Dominion Bureau of Statistics. An estimated 93 percent of total Canadian acreage expected to be sown to spring wheat, oats, barley, flaxseed and mixed grain to us seeded by May 31. This compared with 91 percent a year earlier and 88 percent for the 1958-62 average.

PURCHASE OF 13,185,224 POUNDS OF ROLLED WHEAT FOR DONATION ... was announced June 23. Of this, 4,000,316 pounds were for domestic donation to needy families, the school lunch program, institutions and welfare agencies, and 9,184,908 pounds for donation abroad through U. S. private welfare agencies. Acceptances ranged from \$4.91 to \$7.28 per hundredweight, according to packs and shipping destinations. The 50 to 100 pound pack ranged from \$4.91 to \$5.815 per cwt. The 3-lb. paper pack ranged from \$5.44 to \$7.28 per cwt.

Grains: Export prices basis prompt or 30-day shipment, June 25, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
			--Dollars--		
Duluth	No. 1 Heavy Northern Spring, 14% protein.	1.93	1.26	-	0.97
Baltimore	No. 2 Red Winter	1.67	1.43	2.65	1.27
Gulf	No. 1 Hard Winter: Ordinary protein ... 14% protein	1.73 1.80	1.42 -	2.64 -	2.15 -
Pacific Northwest	No. 2 Western White ..	1.66	-	-	1.07

1/ The export payment rate for wheat on June 25, was C/ per bushel for spring wheat from Duluth, 0¢ for red winter from Baltimore and hard winter from the Gulf, and 5¢ for soft white from the West Coast. Subtracting the export payment rate from the quoted price gives the net price to the foreign buyer.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	June 2/ 1964	May 1964	Apr. 1964	June 1963
Soybean Oil:					
Average price at crushing plant	Cents per lb.	8.3	8.4	7.9	9.0
Value from bushel of soybeans <u>1/</u>	Dollars	0.91	0.92	0.87	0.96
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	66.20	65.10	70.05	70.46
Value from bushel of soybeans <u>1/</u>	Dollars	1.59	1.56	1.68	1.65
Value of oil and meal from bushel of soybeans <u>1/</u>	Dollars	2.50	2.48	2.55	2.61
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.44	2.47	2.53	2.57
Spread between soybean price and value of oil and meal	Cents	6	1	2	2

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64. 2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Soybeans and Flaxseed: Supply and distribution

Item	Soybeans		Flaxseed	
	Year beginning Oct. 1		Year beginning July 1	
	1963-64	1962-63	1963-64	1962-63
	--1,000 bushels--			
Carryover	15,055	57,565	8,388	3,608
Production	701,465	669,211	31,481	32,230
Total supply	716,520	726,776	39,869	35,838
Adjusted total supply <u>1/</u>	716,520	716,276		
Disappearance through May 31:				
Seed, feed and residual for season:	42,000	46,400	800	2,110
Crushed for oil or processed	295,113	326,050	17,414	19,089
Exported	<u>2/</u> 138,350	131,545	<u>2/</u> 3,358	3,972
Total disappearance	475,463	503,995	21,572	25,171
Balance on June 1 for processing, export or carryover	241,057	212,281	18,297	10,667

1/ The soybean supply has been adjusted by subtracting crushings and exports of new-crop soybeans in September and adding an estimate for crushings and exports of new-crop beans the following September. Estimated new-crop crushings and exports were as follows, in million bushels: September 1962 - 17.0; September 1963 - 6.5; and September 1964 - 6.5. No allowance is made for new-crop flaxseed crushed prior to July 1.

2/ Partly estimated.
